Luly E. Massaro, Division Clerk
Rhode Island Division of Public Utilities & Carriers
89 Jefferson Boulevard
Warwick, RI 02888

**RE: Docket No. D-12-12 - Application of The Narragansett Electric Company
d/b/a National Grid Regarding Issuance of New Long-Term Debt
Responses to Division Data Requests – Set 1**

Dear Ms. Massaro:

Enclosed are National Grid's¹ responses to the Division's First Set of Data Requests issued in the above-referenced proceeding.

Thank you for your attention to this transmittal. If you have any questions, please feel free to contact me at (401) 784-7667.

Very truly yours,

Thomas R. Teehan

Enclosure

cc: Leo Wold, Esq., Division
Steve Scialabba, Division

¹ The Narragansett Electric Company d/b/a National Grid ("National Grid" or "Company").

The Narragansett Electric Company
d/b/a National Grid
Division Docket No. D-12-12
In re: Application for Long-Term Debt Issuance
Responses to Division's First Set of Data Requests
Issued May 30, 2012

Division 1-1

Request:

Please provide a copy of all Narragansett Electric and National Grid credit rating reports since January 1, 2011.

Response:

Please refer to Attachment 1- DIV 1-1 for the Company and Attachment 2- DIV 1-1 for National Grid plc credit rating reports.

Credit Opinion: Narragansett Electric Company

Opinion

Corporate Profile

Narragansett Electric Company ("NEC") is a retail distribution company providing electric service to approximately 487,000 customers and gas service to approximately 255,000 customers in 38 cities and towns in Rhode Island. For the year ended March 31, 2010, NEC reported operating revenues for electricity of USD879 million (2009: USD1,128 million) and for gas of USD464 million (2009: USD464 million).

NEC is a wholly owned subsidiary of National Grid USA ("NG USA" rated Baa1/Prime-2, stable) whose ultimate parent is National Grid plc (rated Baa1/Prime-2, stable), a holding company for a range of largely regulated businesses, including transmission and distribution networks in the UK and the Northeastern US.

Recent Developments

Moody's downgraded the ratings of NG USA to Baa1/Prime-2 from A3/Prime-2 on 23 May 2011. This rating action followed the announcement

that 50% of NG USA's ordinary shares had been converted into preference shares indirectly held by NG USA's parent, National Grid Holdings Inc ("NGHI"). Based on Moody's methodology for hybrid instruments (see Revisions to Moody's Hybrid Tool Kit) and NGHI's 100% ownership of NG USA, the preference shares were considered to significantly increase gearing at NG USA to the detriment of its stand-alone credit profile. In particular, the preference shares substantially eliminated excess debt capacity which had previously supported NG USA's rating above the Baa1 level implied by Moody's methodology for complex European utility groups.

National Grid reported its preliminary results for 2010/11 on 19 May 2011, announcing:

- Pre-tax profit up 25%
- Operating profit up 15%
- Capital investment of £3.6 billion including £2.1 billion in the UK regulated businesses

Moody's notes that timing differences, accounting for GBP433 million, were a significant contributor to the GBP476 million growth in operating profit for 2010/11. However, net regulated income also increased, by GBP203 million, due to the emerging benefit of recent rate case settlements for the group's US operations together with customer growth and higher volumes in the US. With low inflation/deflation during 2009 limiting allowed tariff increases under the regulatory RPI-X formula, operating profit for the UK transmission business grew by 4% whilst that for gas distribution fell by 2%.

With gains in the US being offset, to a large extent by higher post-retirement costs (up by GBP89 million) and depreciation (up by GBP41 million), the increase in operating profit on a constant currency basis and excluding timing differences was only around 1%.

In January 2011, National Grid announced a restructuring of its US operations and an efficiency programme targeting a USD200 million per annum cost reduction which it expects to achieve by the end of the 2011/12 financial year.

Rating Rationale

Moody's rating assessment of NEC is based on the rating agency's rating methodology for Regulated Electric and Gas Utilities published in August 2009, and primarily reflects the company's favourable business and operating risk profile underpinned by its natural monopoly position and strong cash flow generation from its regulated activities. The rating also takes into account the company's ownership by National Grid in light of Moody's methodology for complex European utility groups (see European Regulated Utility Groups: Methodology Update, January 2007).

DETAILED RATING CONSIDERATIONS

The following factors influence Narragansett's rating under the Regulated Electric and Gas Utilities methodology.

FACTOR 1: REGULATORY FRAMEWORK

Moody's has a generally favourable view of the regulatory environment in which NEC operates but it is considered less attractive than that covering National Grid's regulated UK subsidiaries and poses a number of challenges for the company.

NEC is subject to regulation by the Rhode Island Public Utilities Commission ("RIPUC") and the Federal Energy Regulatory Commission ("FERC") with respect to the rates that it charges its customers. The RIPUC regulates retail services, including the distribution and sale of natural gas and electricity to consumers. FERC regulates interstate natural gas transportation and electric transmission and has jurisdiction over certain wholesale natural gas sales and wholesale electric sales.

The US regulatory framework has some similarities with that in the UK. For example, each is based on a building block approach intended to allow the utility to recover its operating costs, pay tax, receive regulatory depreciation and earn a return on past investments. However, there are important differences: (i) in many states, the system is based on historic rather than prospective costs; (ii) returns are determined on a nominal rather than a real basis; (iii) US regulators take account of the actual rather than a notional capital structure; and (iv) US utilities are able to make full or partial filings as necessary rather than being bound by a fixed regulatory timetable. Finally, the US system is quasi-judicial with multiple parties including government bodies and officials, consumer advocacy groups and various energy consumers, who have differing concerns, but generally a common objective of limiting rate increases.

Whilst the regulatory framework in the US in general and for NEC specifically is well developed, it can be politically charged and challenging for the utility. This is not helped by the fact that NEC bills many of its customers (including most if not all residential customers) for both the cost of transmission/distribution and the energy that they consume and regulators look at the total impact on bills of each decision that they make. Particularly when general economic conditions are difficult, it can be hard for regulated US utilities to achieve support for planned investments and what they may consider an adequate level of returns in new rate case applications.

We assign NEC a score of Baa for the Regulatory Framework sub-factor under the Methodology recognising the established framework but also the associated challenges for the operator. This is in line with the score assigned to many of the rated US utilities for this sub-factor but below the Aa assigned to the parent company, National Grid plc. The parent company score reflects the regulatory framework for the US subsidiaries and also Moody's favourable view of the regime which applies to the group's UK subsidiaries.

FACTOR 2: ABILITY TO RECOVER COSTS AND EARN RETURNS

In June 2009, NEC filed a rate case application for its electricity distribution business seeking inter alia a revenue increase of USD75.3 million per year (a 34% increase) based on a return on equity of 11.6%, rate decoupling (meaning that future revenues would not be exposed to electricity consumption) and a capital tracker adjustment designed to match actual capital expenditures incurred to amounts recovered in base rates. The requested revenue increase was subsequently revised downwards to USD67.5 million.

In February 2010, the RIPUC allowed an increase in distribution revenue of approximately USD23.5 million, based on a return on equity of 9.8% with effect from the beginning of that year. The regulator disapproved several of NEC's other proposals including revenue decoupling and the capital tracker adjustment. NEC filed a petition with the Rhode Island Supreme court appealing the RIPUC's decision in April 2010.

In May 2010, Rhode Island enacted decoupling legislation that provides for the annual reconciliation of the revenue requirement allowed in NEC's base distribution rates to actual revenue received for both the electric and gas business. The law also provided for the submission and

approval of annual infrastructure spending plans that would provide for a reconciling allowance for anticipated capital spending on utility infrastructure and other costs related to maintaining system safety and reliability on an annual basis, without having to file a full base rate case.

The achieved return on equity for the electric business in 2010 was 11.8%.

In November 2008, the RIPUC approved a rate plan which provided for a 10.9% increase in gas distribution revenues based on a 10.5% allowed ROE together with a full reconciliation of pension and postretirement benefits other than pensions and a capital investment reconciliation. As for electricity, the RIPUC denied a revenue decoupling proposal, however, the May 2010 legislation discussed above, also applies to NEC's gas business and provides for decoupling as is typically employed by gas utilities in the US. NEC filed its decoupling plan for gas and electricity in October 2010 and, once approved, this is expected to apply retrospectively from April 2011.

The achieved return on equity for the gas business in 2010 was 1.7% but, according to National Grid, would have been 8.4% if the new rate plan had been in effect for the full year.

We assign a score of Baa for this sub-factor under the Methodology recognising that rate reviews for NEC are conducted within an established framework but are nevertheless prone to political interference and challenge resulting in a degree of uncertainty about the company's ability to recover its costs and earn the targeted level of returns. This scoring is in line with that for many other rated US utilities but below the single-A assigned to National Grid plc, reflecting the group's US and UK operations.

FACTOR 3: DIVERSIFICATION

Diversification is considered under the Methodology as, in general, a balance among several different businesses, geographic regions or regulatory regimes reduces the risk that a company will experience a sudden or rapid deterioration in its overall creditworthiness because of an adverse development specific to any one part of its operation.

We assign a score of Ba to NEC under this sub-factor recognising the limited scale of its operations and very significant exposure to the decisions of the RIPUC. This scoring is below that assigned to the larger US utilities, many of which are scored in the Baa to single-A range and the Aa scoring for National Grid as a group.

FACTOR 4: FINANCIAL STRENGTH AND LIQUIDITY

NEC has historically had very robust financial metrics, typical of what we might expect to see for a Aa rated utility. With increasing borrowing (NEC issued USD550 million of bonds in March) and the payment of dividends (USD320 million during 2010), the key metrics have weakened but are nevertheless consistent with a rating in low single-A.

Liquidity

NEC maintains a sufficient level of liquidity primarily by supplementing its internally generated cash flow through participation in the NG USA money pool, the purpose of which is to utilise family cash resources more effectively and reduce the need for external short-term borrowing. Participating subsidiary companies contribute their excess cash to the pool which is first used to meet the short-term borrowing needs of eligible subsidiaries. Companies borrowing from the pool pay rates linked to A1/P-1 30-day commercial paper rates. Any remaining cash is typically invested into Aaa rated money funds with same day liquidity. As a measure of additional security, NG USA's parent, the UK-based National Grid plc, has the ability to increase the amount of cash in the pool through direct loans to NG USA. Alternatively, NG USA can also issue commercial paper and medium term notes in lieu of or to supplement direct loans from the UK parent.

As of March 31, 2010, NEC had about US\$7.7 million of unrestricted cash on hand and approximately US\$71 million of short-term debt outstanding to affiliates under the money pool. Aside from modest sinking fund payments in the future, NEC's next long-term debt maturity is not until a US\$14.5 million first mortgage bond issue matures on April 1, 2018.

We note the sale by NEC in March 2010 of USD550 million of 10 and 30-year bonds. According to the company, proceeds are to be used to (i) retire short-term debt, (ii) to finance future capital expenditure and/or (iii) for general corporate purposes, including the payment of dividends. Capital expenditures for the fiscal year ended March 31, 2010 were about USD155 million (2009: USD122 million) and are expected to be at least that amount or slightly more for the 2011 fiscal year as the company continues its Reliability Enhancement Program and participation in regional transmission projects with other utilities.

Rating Outlook

The outlook for NEC rating is stable reflecting Moody's outlook on the credit quality of the National Grid group as a whole.

What Could Change the Rating - Up

The 2010 rights issue left National Grid and its subsidiaries better positioned in their rating categories. Moody's notes however the large capital investment programme for the UK and the possibility of additional investment in the US (above and beyond what is currently planned) which will most likely reduce financial flexibility over time. The rating agency further considers that the group will favour using free cash flow to fund shareholder distributions and/or support growth rather than to reduce gearing. On this basis, upward rating pressure for National Grid and its subsidiaries is considered unlikely in the medium term.

What Could Change the Rating - Down

On a stand-alone basis, NEC's ratings could come under pressure if coverage of interest and debt by cash flow from operations (exclusive of the effects of changes in working capital) were to fall below 4.5x and 22%. However, further to the comments above, we consider the company's ratings in the context of the National Grid group as a whole. Accordingly, whilst we may maintain the current rating even if ratios were to weaken below the above levels, there would be negative rating pressure if Moody's were to consider that the overall credit quality of the National Grid group had deteriorated.

Narragansett Electric Co.

Major Rating Factors

Strengths:

- Consistent focus on low-risk electricity and natural gas transmission and distribution operations.
- Predictable revenues and cash flows from regulated activities, which account for over 97% of operating profits.
- Operating, market, and regulatory diversity in the U.K. and the U.S.
- Relatively supportive regulatory environments.
- Proven track record of managing large acquisitions.

Corporate Credit Rating

A-/Stable/A-2

Weaknesses:

- High consolidated financial leverage as a result of previous acquisitions.
- Substantial capital expenditures and dividends that will likely result in negative free cash flows over the medium term.
- Regulatory reset risk in U.K. and in the U.S.
- Exposure to foreign exchange risk and inflation, which add volatility to adjusted credit measures.

Rationale

Standard & Poor's Ratings Services bases the ratings on Narragansett Electric Co. on the consolidated credit profile of its ultimate parent, U.K.-based gas and electricity network operator National Grid PLC (NG PLC) and its family of companies. Narragansett Electric is a wholly owned subsidiary of U.S.-based utility holding company National Grid USA, a wholly owned subsidiary of NG PLC. National Grid USA is also a subsidiary of intermediate holding company National Grid Holdings Inc. National Grid USA's main operating subsidiaries include Niagara Mohawk Power Corp., KeySpan Corp. and its units, New England Power Co., Narragansett Electric, Massachusetts Electric Co., Boston Gas Co., and Colonial Gas Co.

The ratings on NG PLC and its subsidiaries reflect our view of the strong and predictable cash flows from the group's low operating risk electricity and gas network operations in the U.K. and the U.S.; regulatory regimes in each of those countries that we consider to be broadly supportive of credit quality; a consistently applied strategic and financial policy; and a proven track record of managing large acquisitions.

These strengths are offset by NG PLC's relatively high financial leverage; a substantial capital expenditures (capex) program and unchanged dividend policy that together will likely result in negative free cash flows over the medium term; regulatory reset risk in the U.S. and the U.K.; and exposure to foreign exchange risks and inflation, which add volatility to Standard & Poor's-adjusted credit measures.

NG PLC has an excellent business risk profile (corporate business risk profiles are ranked from excellent to vulnerable) and a significant consolidated financial risk profile (financial profiles are ranked from minimal to highly leveraged). (For more on business risk and financial risk, see "Business Risk/Financial Risk Matrix Expanded," published May 27, 2009, on RatingsDirect on the Global Credit Portal.)

National Grid USA delivers electric service to approximately 3.3 million electric customers in New York, Massachusetts, Rhode Island, and New Hampshire, and manages the electricity network on Long Island under an agreement with the Long Island Power Authority (LIPA) that expires in 2013. The company also owns over 4,000 megawatts of contracted generation that provides power to more than 1 million LIPA customers. National Grid USA also distributes natural gas to about 3.4 million customers in the same four states.

National Grid USA's consolidated business risk profile is also excellent, although weaker at KeySpan Corp. due to its riskier nonregulated generation operations. National Grid USA's business position is characterized by a focus on relatively low-risk regulated electric and natural gas transmission and distribution operations and regulatory, market, and operating diversification.

Narragansett Electric is a retail distribution company providing electric and gas service in Rhode Island. Narragansett Electric also has an excellent business risk position, reflecting relatively low-risk distribution operations, offset somewhat by regulation in Rhode Island, which we view as less credit supportive. In March 2011, the Rhode Island Public Utilities Commission approved a \$3.3 million electric distribution rate increase and a \$1.8 million gas rate hike. And, on July 26, 2011, the commission approved the company's request for revenue decoupling, which removes the link between revenues and sales so that the company is indifferent to changes in usage.

Historically, regulation in National Grid USA's service territory has been reasonably supportive of creditworthiness, but long-term rate plans, rate moratoriums, and regulatory lag have resulted in earned returns that are below the national average in some jurisdictions. However, with full realization of rate relief and authorization of various rate mechanisms and trackers, earned returns for certain subsidiaries have improved. In that regard, the U.S. business achieved an 8.2% return on equity (ROE) in 2010-2011 compared with 6.9% ROE in 2009-2010. In an effort to continue to increase returns in the U.S. and become more efficient, NG PLC announced a restructuring program in early 2011. The plan involves a regional focus and a reduction in operating costs of about \$200 million by March 31, 2012, achieved mainly through a 7% reduction of the U.S. workforce. The cost cuts, future rate relief, and mechanisms such as decoupling, capital trackers, and true-ups for commodity-related bad debt and pensions and other postretirement benefits should help to lift financial metrics and allow the utilities to earn closer to their allowed returns.

In light of National Grid USA's heavy capital expenditure phase and escalating cost pressures, timely and sufficient rate relief and alternative-cost-recovery rate mechanisms, as well as credit supportive action by management, will be important to enhance cash flow and earnings protection. Certain state regulators, however, will be reviewing prospective rate requests at a time of economic weakness, so the subsidiaries' ability to manage regulatory risk will be critical to credit quality.

In late 2010, NG PLC signed an agreement with a subsidiary of Algonquin Power & Utilities for the sale of its Granite State Electric and EnergyNorth businesses in New Hampshire for \$285 million, plus an amount related to working capital. NG PLC decided to exit the businesses in New Hampshire, since their rate plans represent less than 2% of the U.S. rate base and do not enable the company to earn acceptable returns. Subject to various regulatory approvals, the sale is expected to close in the second half of 2011.

Key business and profitability developments

NG PLC reported a robust set of results for the 12 months ended March 31, 2011, with operating profit before exceptional items up by 15% year on year, to £3.6 billion. This increase resulted mainly from timing items of £433

million that will not be repeated this year. Pretax profit increased by 25% over the same period and financing costs decreased by 2% as higher costs related to the effect of inflation in the U.K. on indexation of inflation-linked debt (about 30% of NG PLC's long-term debt) were offset by lower net pension charges and lower overall net debt, reflecting the benefit of the cash proceeds of a rights issue.

NG PLC completed the £3.2 billion rights issue to support funding for a significant increase in the group's capex program. The program allows for £22 billion of capex in the next five years, compared with £14 billion in the five years up to March 2010. We expect the rights issue to position NG PLC more comfortably within the existing ratings, and to provide a degree of headroom that was previously lacking. In our opinion, the rights issue also underlines NG's unchanged goal of maintaining an 'A' category rating for its U.K. operating subsidiaries.

We believe that NG PLC's results will return to more moderate levels of growth in the next financial year. In our view, the increase in inflation in 2010-2011 will lead to higher inflation-linked regulated revenues in 2011-2012, which will be partially offset by an increase in financing costs on inflation-linked debt.

NG PLC's business risk has not materially changed over the past 12 months, in our view. The group remains focused on owning and operating regulated network assets in the U.K. and U.S., which account for over 97% of consolidated operating profit. NG PLC faces some regulatory reset risk in the U.S., and U.S. revenues remain subject to an element of volume risk, although this has significantly diminished with the renewal of rate plans that protect NG PLC from fluctuations in volumes sold. In an effort to increase returns in the U.S. and become more efficient, NG PLC recently announced a restructuring program. The plan involves a regional focus and a reduction in operating costs of about \$200 million by March 31, 2012, achieved mainly through a 7% reduction of the U.S. workforce.

The group also remains exposed to risks arising from the regulatory reset in the U.K. (currently every five years). The next price control period starts in April 2013 and is currently under consultation at the industry regulator, the Office of Gas and Electricity Markets (Ofgem).

Key developments in consolidated cash flow and capital structure

NG PLC's robust performance in 2010-2011 resulted in strengthened credit metrics for the group. Reported operating cash flow in the 12 months ended March 31, 2011, was up 12% to £4.7 billion, while reported net debt decreased to £18.7 billion from £22.1 billion a year ago. The reduction in the net debt position reflects the £3.2 billion of cash from the rights issue and the effect of the weakening exchange rate between the U.S. dollar and British pound sterling on the U.S.-dollar-denominated debt, which was partly offset by capital investment.

Consequently, the ratio of NG PLC's adjusted funds from operations (FFO) to debt was about 17%, which compares positively with the rating threshold of above 12%.

Liquidity

The 'A-2' short-term rating on NG PLC, National Grid USA, and subsidiaries largely reflects the companies' long-term credit ratings and our view that the group's liquidity is adequate. Projected sources of liquidity (mainly operating cash flow and available bank lines) exceed projected uses (mainly necessary capex, debt maturities, and dividends) by more than 1.2x. NG PLC's ability to absorb high-impact, low-probability events with limited need for refinancing, its flexibility to reduce capital spending or sell assets, its sound bank relationships, its solid standing in credit markets, and its generally prudent risk management further support our opinion of liquidity as adequate.

The following factors also support our assessment of NG PLC's adequate liquidity:

- Access to unrestricted short-term cash and short-term marketable securities of £2,866 million as of June 30, 2011;
- Undrawn committed credit facilities of £2,676 million with a maturity longer than 12 months; and
- Our expectation that NG PLC will generate modest and slightly higher adjusted funds from operations (FFO) in 2011-2012 than the €3,565 million achieved in 2010-2011.

These factors compare with our expectation that in 2011-2012 NG PLC will face:

- About £3,600 million in capital expenditures;
- Dividend payments of about £1,000 million; and
- £1,727 million in short-term debt maturing over the next 12 months.

We understand that there are no restrictive covenants in the documentation attached to the group's debt.

Recovery analysis

We assign recovery ratings to first mortgage bonds (FMBs) issued by investment-grade U.S. utilities, which can result in issue ratings being notched above a utility's corporate credit rating (CCR) depending on the CCR category and the extent of the collateral coverage. We base the investment-grade FMB recovery methodology on the ample historical record of nearly 100% recovery for secured bondholders in utility bankruptcies and on our view that the factors that supported those recoveries (limited size of the creditor class, and the durable value of utility rate-based assets during and after a reorganization, given the essential service provided and the high replacement cost) will persist in the future. Under our notching criteria, when assigning issue ratings to utility FMBs, we consider the limitations of FMB issuance under the utility's indenture relative to the value of the collateral pledged to bondholders, management's stated intentions on future FMB issuance, as well as the regulatory limitations on bond issuance. FMB ratings can exceed a utility's CCR by up to one notch in the 'A' category, two notches in the 'BBB' category, and three notches in speculative-grade categories.

Narragansett Electric's FMBs benefit from a first-priority lien on substantially all of the utility's real property owned or subsequently acquired. Collateral coverage of more than 1.5x supports a recovery rating of '1+' and an issue rating one notch above the CCR.

Outlook

The stable outlook on Narragansett Electric mirrors our outlook on ultimate parent NG PLC and reflects our view that the group's operational and financial performances will continue to be solid. It also reflects our belief that NG PLC will continue to focus on its regulated gas and electricity network businesses in the U.K. and the U.S., while maintaining consolidated, adjusted FFO to total debt of more than 12%.

Ratings downside could occur if NG PLC's financial performance were to deviate materially from our forecasts without the implementation of offsetting measures, or if the group were to undertake a significant acquisition. In that regard, if consolidated FFO to total debt were to decline to 10%-11% due to higher capital outlays and acquisitions and associated debt financing, we could lower the ratings.

Although we view the May 2010 rights issue as providing more headroom than NG PLC previously had at the

current rating level, we continue to view ratings upside as unlikely because of the company's ambitious capital expenditure plans and our expectations regarding its financial performance.

Business Description

NG PLC is a U.K.-based investor-owned utility. Through subsidiary National Grid Electricity Transmission PLC (NGET; A-/Stable/A-2), it owns and operates the high-voltage electricity transmission system in England and Wales, and through subsidiary National Grid Gas PLC (NGG; A-/Stable/A-2), it owns the U.K. gas transmission network and four local gas distribution networks. Following the acquisition of KeySpan in 2007, NG PLC is, through National Grid USA, also the second-largest utility in the U.S., as measured by customer numbers. National Grid USA has a significant presence in electricity transmission and distribution and gas distribution in Massachusetts, Rhode Island, New York, and New Hampshire.

NG PLC directly serves around 19 million customers in both markets and employs more than 28,000 people. In the financial year ending March 31, 2011, NG PLC reported revenues of £14.34 billion, with operating profit before exceptional items up by 15% year on year to £3.6 billion, although timing items of £433 million that will not be repeated next year contributed considerably to this figure.

Rating Methodology

In accordance with our parent-subsidary rating criteria, the ratings on NG PLC and its subsidiaries reflect the consolidated corporate credit profile of the whole group, including the operating companies NGET, NGG, and the subsidiaries of National Grid USA. We rate the long-term debt at the holding-company level 'BBB+', one notch below the corporate credit rating, to reflect the structural subordination of holding-company debt to operating-company liabilities. Structural subordination affects debt or guarantees issued at NG, National Grid USA, and NGG Finance PLC (not rated; guaranteed by National Grid Holdings One PLC and NG PLC).

The ratings on KEDNY and KEDLI are one notch higher than NG PLC's corporate credit rating, reflecting the presence of regulatory insulation and their healthier stand-alone financial profiles.

Business Risk Profile: Excellent, With Stable And Predictable Cash Flow From Regulated Businesses, And Good Quality Operations

The major strengths of NG PLC's excellent business risk profile are:

- NG PLC's credit quality, which is underpinned by the strong, stable economies in which the group operates and the favorable regulation that offsets demand volatility. Virtually all of NG PLC's operating profits come from the U.K. and the U.S.
- The contribution from stable and predictable cash flows derived from regulated networks, which generate over 97% of the group's earnings. Although they vary between U.K. and U.S., the regulatory regimes are transparent and generally supportive of credit quality.
- NG PLC's solid operating performance and frequent outperformance of efficiency targets. Furthermore, it has a good track record of cost reduction and successful integration following acquisitions or mergers. NG PLC met or exceeded most of its operational targets in 2010-2011. Under the U.K. regulatory framework, it achieved system

reliability of 99.99% in electricity and 100% in gas transmission, as in previous years. Similarly, there were no reliability issues in U.K. gas distribution. In U.S. transmission and distribution, NG PLC fully met its targets for network reliability.

- The fact that the U.K.'s remuneration is cost-plus based and not a function of electricity or gas demand. This has been a supporting factor in the past few years' recessionary environment. Future operating profit margins are, however, mostly reliant on NG PLC's ability to control costs while managing capital projects required to sustain or improve network quality and match performance requirements.

These strengths are mitigated by the following constraints:

- Uncertainty about the impact of a new U.K. transmission and distribution regulatory framework. As part of RIIO (Revenue = Incentives + Innovation + Outputs regulatory review), Ofgem published a decision that the life of new electricity distribution assets will change from 20 to 40 years. This change will take effect with the start of the next regulatory period, on April 1, 2015. We think the slow depreciation of assets will constrain cash flow generation in the medium term, although to a different extent for each network operator. At the same time, the slow depreciation should reduce leverage in terms of debt to regulatory capital value. We do not yet factor this change in our ratings because, first, the impact will depend on the overall package of regulatory decisions, and second, Ofgem has stated its willingness to consider transitional arrangements to smooth the impact.
- Substantial capex of about £22 billion over the next five years. This is likely to increase operational challenges in the short term, but should lead to operational improvements in the medium to long term. The capex, of which £15.1 billion is to be used in the U.K.-regulated business, derives from the need to reconfigure the electricity transmission network to handle large quantities of intermittent renewable power and to remodel the gas network to accommodate an increase in imports, especially liquefied natural gas.
- NG PLC's highly acquisitive strategy, including in nondomestic markets. However, the group has so far demonstrated a good track record of cost reduction and successful integration following acquisitions or mergers.
- Regulatory reset risk and volume risk in the U.S. Historically, regulation has been reasonably supportive of creditworthiness, but long-term rate plans, rate moratoriums, and regulatory lag have resulted in earned returns that are below the national average in most jurisdictions. U.S. revenues also remain subject to an element of volume risk. We believe that the subsidiaries' ability to manage regulatory risk remains critical to credit quality.

Financial Risk Profile: Significant, With High Leverage And Material Capex Requirements

The main weaknesses of NG PLC's significant financial risk profile are:

- High consolidated financial leverage as a result of previous acquisitions.
- Negative cash flow generation, anticipated over the next five years, due to the company's large capex program (£22 billion to 2015) and dividend payments. However, we anticipate adjusted FFO to debt to maintain a cushion above our 12% target for the rating.
- An aggressive policy of raising dividends by about 8% annually, resulting in a payout ratio of about 68% as of March 31, 2011.
- Exposure to foreign exchange risk and inflation, which add volatility to adjusted credit measures. NG PLC mitigates currency risk on its cash flows by matching the currency of its debt; however, it remains exposed to translation risk. A high retail price index increases the amount of inflation-linked debt indexation that we deduct

from FFO in accordance with our criteria.

These weaknesses are partially mitigated by:

- A significant degree of cash flow predictability, since regulated businesses generate 95% of the group's cash flow.
- Management that publicly aims to maintain the current rating and is therefore committed to maintaining adjusted FFO to debt of more than 12%. The recent rights issue underlines NG PLC's unchanged goal of maintaining an 'A' category rating for its U.K. operating subsidiaries.
- NG PLC's good access to bank financing and the capital markets, with well-diversified funding sources. The group was able to maintain full access to the bond markets during the financial crisis, and its recent £3.2 billion rights issue was fully underwritten.

Financial Statistics/Adjustments

NG PLC's last full, consolidated accounts, for the fiscal year to March 31, 2011, were prepared according to International Financial Reporting Standards.

We make a number of adjustments to NG PLC's reported figures (see table 3). The most important are as follows:

- To debt, we add operating lease liabilities of £593.3 million, representing the present value of future operating lease obligations.
- We also add postretirement benefit obligations of £1,198 million to debt. We view pension deficits as debt-like obligations.
- We subtract surplus cash of £2,938 million from debt. This comprises unrestricted cash and marketable securities, and investments in short-term money market funds.
- In line with our criteria, we also subtract from debt the difference between the debt shown on the balance sheet and the value of debt that is locked in through principal hedges. Therefore, for NG PLC, we subtract a positive value of principal hedges on currency derivatives of £1,130 million from debt. This amount reflects the difference between reported debt and the value of foreign currency debt that has been locked in to maturity through currency derivatives.
- We subtract £238 million in replacement expenditures (repex) from cash flow from operations, representing the reclassification of 50% of repex from capex to operating expenditure. This adjustment reflects the regulatory treatment.
- We subtract from FFO indexation of £248 million, in line with our criteria for inflation-linked debt (see "New Methodology For Inflation-Linked Debt Has No Immediate Effect On Ratings On U.K. Regulated Utilities," published April 8, 2009).

Opinion

Corporate Profile

National Grid Plc ("National Grid", rated Baa1/P-2) is the holding company for a range of largely regulated businesses focusing on the ownership and operation of electricity and gas networks in the UK and the US.

In the UK, National Grid Electricity Transmission plc ("NGET", rated A3), owns the high-voltage electricity transmission network in England and Wales and operates the system across Great Britain. National Grid Gas plc ("NGG", rated A3) owns and operates the high pressure gas transmission system in Britain and its distribution business delivers gas to 11 million homes and commercial customers.

In the US, National Grid distributes electricity to nearly five million customers in Massachusetts, New Hampshire, New York and Rhode Island. Owning 4,000 megawatts of electricity generation, it is the largest power producer in New York State - carrying power to over one million customers on Long Island. It is also the largest distributor of natural gas in the northeastern US, delivering gas to 3.4 million customers in New York, Massachusetts, New Hampshire and Rhode Island.

National Grid also has a number of related unregulated businesses such as Liquefied Natural Gas importation and storage, land remediation and metering. These operate mostly in the UK and are modest in the context of the group as a whole, accounting for around 5% of revenue and 3% of operating profit in the year to March 2011.

Recent Developments

National Grid reported its preliminary results for 2010/11 on 19 May 2011, announcing:

- Pre-tax profit up 25%
- Operating profit up 15%
- Capital investment of £3.6 billion including £2.1 billion in the UK regulated businesses

Moody's notes that timing differences, accounting for GBP433 million, were a significant contributor to the GBP476 million growth in operating profit for 2010/11. However, net regulated income also increased, by GBP203 million, due to the emerging benefit of recent rate case settlements for the group's US operations together with customer growth and higher volumes in the US (see comment on decoupling in Ability to Recover Costs and Earn Returns below). With low inflation/deflation during 2009 limiting allowed tariff increases under the regulatory RPI-X formula, operating profit for the UK transmission business grew by 4% whilst that for gas distribution fell by 2%.

With gains in the US being offset, to a large extent by higher post-retirement costs (up by GBP89 million) and depreciation (up by GBP41 million), the increase in operating profit on a constant currency basis and excluding timing differences was only around 1%.

Ofgem, the regulator for the electricity and gas markets in Great Britain, is continuing consultations on its new RIIO (which stands for Revenues, Incentives, Innovation and Outputs) approach to price controls. As the next part of this process, NGG and NGET will submit business plans for the period from April 2013 to March 2021 in July 2011. These plans will include National Grid's proposals for matters including

incentives and transitional arrangements regarding proposed changes to asset depreciation.

In January 2011, National Grid announced a restructuring of its US operations and an efficiency programme targeting a USD200 million per annum cost reduction which it expects to achieve by the end of the 2011/12 financial year.

Rating Rationale

Moody's rating assessment of National Grid is based on the rating agency's methodologies for (i) Regulated Electric and Gas Utilities published in August 2009 and (ii) complex European utility groups (see European Regulated Utility Groups: Methodology Update, January 2007). The ratings reflect the clear and conservative business strategy of the group with its focus on regulated operations in the UK and US but also the high level of debt, a large ongoing capital investment programme and the level of shareholder returns.

DETAILED RATING CONSIDERATIONS

The following factors influence National Grid's ratings:

FACTOR 1: REGULATORY FRAMEWORK

In the UK, NGG and NGET are subject to regulation by Ofgem whilst National Grid's regulated US subsidiaries are variously subject to regulation by FERC, New York PSC, Massachusetts DPU, Rhode Island PUC and New Hampshire PUC.

There are some similarities between the regulatory regimes in the US and UK. For example, each is based on a building block approach intended to allow the regulated entity to recover its operating costs, pay tax, receive regulatory depreciation and earn a return on past investments. However, there are important differences: (i) the US system is often based on historic rather than prospective costs although this is not the case in New York and Rhode Island; (ii) returns are determined on a nominal basis in the US but a real basis in the UK; (iii) US regulators take account of the actual rather than a notional capital structure; and (iv) US utilities are able to make full or partial filings as necessary rather than being bound by a fixed regulatory timetable as is the case in the UK. We note also that the US system is quasi-judicial with multiple parties including government bodies and officials, consumer advocacy groups and various energy consumers, who have differing concerns, but generally a common objective of limiting rate increases.

Whilst noting the continuing RIIO process, Moody's considers the regulatory regime in the UK to be stable and predictable with a track record that demonstrates a high degree of transparency and hence limited regulatory uncertainty. For NGG and NGET we assign a score of Aaa for Regulatory Framework. This is consistent with the score assigned for the stability and predictability of the regulatory regime for other regulated network businesses in the UK.

National Grid's US operating subsidiaries benefit from well developed regulatory frameworks but they are not considered by Moody's to be as predictable or transparent as the regime in the UK. In particular there is evidence of some inconsistency or unpredictability in their application *inter alia* due to political considerations or pressure. On this basis, we assign a score of Baa for Regulatory Framework for the US subsidiaries and a blended score of Aa for the group as a whole for this rating factor.

FACTOR 2: ABILITY TO RECOVER COSTS AND EARN RETURNS

National Grid's ability to recover its costs and earn returns differs across the different subsidiaries and regulatory jurisdictions although, further to our comments on the different regulatory frameworks, the extent of the variation is limited. In the UK, NGG and NGET benefit from a tariff formula that allows for the recovery of efficient expenditure and depreciation set by Ofgem at five-yearly periodic reviews

(expected to be extended to eight years under RIIO). Rate/tariff reviews and cost recovery in the US is considered to be fairly predictable with new plans providing a generally fair return on investments with limited instances of regulator challenge.

A number of National Grid's regulated US subsidiaries have suffered poor returns over recent years as they have reached the end of long-term (10 year) rate plans. This has been due to higher than anticipated capital expenditure (capex), bad debts and increasing pension and healthcare costs and the achieved return on equity for the group had, in some cases, fallen below 5%. Since January 2008, new rate cases have come into effect for all of National Grid's US rate base and the group has been largely but not wholly successful in achieving an allowed return on equity in excess of 10% and meeting its goals including revenue decoupling, pension and other true ups and capex trackers. The most recent rate case settlement, for the Niagara Mohawk electric business, which accounts for 25% of National Grid's US rate base, was announced in January 2011 with the New York PSC approving a 9.3% return on equity and a USD119 million rate increase, some way short of what was requested.

For 2010/11, National Grid reported an achieved return on equity for its US operations of 8.2%, up from 6.9% for the prior year but still very much below the 11.9% three year average RoE for the group as a whole (as calculated by National Grid). Further rate case filings for the US businesses are anticipated as the group tries to improve returns, particularly in the 11% of its rate base that it describes as 'underperforming' and we also note the ongoing cost cutting exercise.

Following the approval of decoupling plans for NG's Rhode Island business, all of the group's continuing US distribution businesses will feature decoupling as part of their rate plans. We do not, therefore, anticipate the group benefitting in the future from hot summers, as was the case for year to March 2011. Conversely, the group will not be exposed to lower demand.

We assign a score of single-A for Ability to Recover Costs and Earn Returns under the methodology on a blended basis. This score recognises that rate/tariff review outcomes across the group are fairly predictable with a generally fair return on investments albeit there is a tendency toward politically motivated challenge or intervention in the US which would result in some of those subsidiaries being scored in the Baa category for this factor. A majority of the issuers covered by the methodology are scored in the single-A/Baa categories.

FACTOR 3: DIVERSIFICATION

Diversification is considered under the Regulated Electric and Gas Methodology as, in general, a balance among several different businesses, geographic regions or regulatory regimes reduces the risk that a company will experience a sudden or rapid deterioration in its overall creditworthiness because of an adverse development specific to any one part of its operation.

National Grid has material operations in gas transmission and distribution, electricity transmission, distribution and generation across a number of different regions and regulatory regimes and thus enjoys the benefit of significant diversification. We thus assign a score of Aa for this factor .

FACTOR 4: FINANCIAL STRENGTH AND LIQUIDITY

National Grid demonstrated solid performance in terms of its key financial metrics for the year to March 2010, reflecting strong earnings growth for the regulated UK electricity and gas transmission and distribution businesses. Key ratios for the year to March 2011 will benefit from receipt of the GBP3.2 billion rights issue proceeds and also the impact of the weakening USD/GBP exchange rate on the group's USD denominated debt. However, the group reported only a 2% reduction in net finance costs for FY11 with higher interest charges for the group's index-lined debt offsetting the reduction in net debt due to the rights issue.

The credit metrics for National Grid under the Regulated Electric and Gas Methodology result in scores in

the Baa range.

As was the case prior to the introduction of the Regulated Electric and Gas Methodology, we will continue to focus on the RCF/Net Debt and FFO Interest Cover ratios for the group as a whole. Moody's considers that these two metrics effectively capture the group's financial performance and allow the rating agency to provide clear guidance to the group and the market. Moody's guidance for the group's current ratings are FFO interest cover of at least 3.0x and RCF to Net Debt of at least 9.0%.

In its analysis, Moody's also considers the debt capacity of the group. We calculate the excess debt capacity at each operating company i.e. debt capacity at the current rating level less the amount of debt then outstanding. We then compare the aggregate debt capacity across all of the operating companies with the debt at National Grid plc to see if it is adequately supported. Our analysis suggested that this was the case as at March 2010 and the rights issue will have provided further headroom.

Liquidity

As at 31 March 2011, National Grid had cash and cash equivalents of GBP384 million, GBP2,939 million of financial instruments and around GBP2.6 billion of undrawn committed bank facilities.

National Grid enjoys good access to the capital markets although issuance was limited during FY11 following receipt of the rights issue proceeds. Indeed, to manage its cash resources efficiently, the group used around GBP1.3 billion of cash to redeem a range of debt securities and bank loans during the year.

National Grid's liquidity profile is generally characterised by cash inflows from dividends and intercompany interest from its regulatory ring fenced subsidiaries. These cash streams fund the company's dividend and interest, although the latter is predominantly serviced from USD cash streams derived from the US operations. The regulatory frameworks in the US and the UK provide some degree of restriction in terms of dividend distributions, whereby lock-ups will usually be triggered as soon as the operating entity is at the risk of losing its investment-grade rating. For the US subsidiaries also certain leverage levels are applied, which if breached would trigger distribution lock-ups. As such these dividend inflows are of less quality to the group than actual cash reserves, but Moody's acknowledges that at current rating and leverage levels there remains adequate headroom for dividend payments from the operating subsidiaries.

Moody's notes National Grid's large capital programme. For the financial year ending March 2011, the group invested a total of GBP3.6 billion, GBP265 million more than in the prior year (but GBP300 million less than previously anticipated by the group). Over the four years to March 2015, the group plans to invest around GBP19 billion. These investments are primarily driven by a need for asset replacement, but also changes in sources of gas supply and electricity generation. The management of the capital programme and the associated funding is considered a key challenge for the group, as the plan relates largely to non-discretionary capex.

National Grid has a US CP programme (USD3.0 billion) and ECP programme (USD1.5 billion), which are utilised for working capital management and to help hedge the group's US investments exposure. As of 31 March 2011 there was no outstanding issuance under the programmes. Moody's notes management's treasury policy to limit issuance at any one time to the amount of its committed back-up facilities, to the extent that these lines are not already utilised to back up National Grid USA's, NGET's or NGG's CP issuance.

Structural Considerations

National Grid's assigned Baa1/P-2 ratings take into account structural subordination of current and future anticipated debt. The ratings thereby reflect bondholders' distance from the operating companies' cash flows, the size of current and anticipated future debt carried by the operating entities and the possible negative consequences of the regulatory ring-fencing applicable to the UK operating companies for bondholders at National Grid. Moody's notches the holding company by one notch down from the

consolidated group's credit quality, which is seen as low single-A, in line with the methodology grid implied A3 rating shown in the table below.

Rating Outlook

The 2010 rights issue strengthened National Grid's balance sheet, establishing a degree of headroom within the current rating categories which has, in recent years, been absent. This headroom is, however, expected to be eroded over the medium term by the continuing capital investment programme and dividend payments.

What Could Change the Rating - Down

Moody's anticipates that National Grid will demonstrate that it is able to achieve ratios of (i) consolidated RCF to Net Debt in excess of 9.0% and (ii) FFO Interest Cover in excess of 3.0x in 2011/12 and beyond and a failure to do so would likely lead to negative rating pressure.

We anticipate that any large expansion of the capital investment programme or material acquisitions will be supported by balance sheet strengthening.

What Could Change the Rating - Up

The rights issue announced in May 2010 left National Grid and its subsidiaries better positioned in their rating categories. Moody's notes however the large capital investment programme for the UK and the possibility of additional investment in the US (above and beyond what is currently planned) which will most likely reduce financial flexibility over time. The rating agency further considers that the group will favour using free cash flow to fund shareholder distributions and/or support growth rather than to reduce gearing. On this basis, upward rating pressure for National Grid and its subsidiaries is considered unlikely in the medium term.

Opinion

Corporate Profile

National Grid Plc ("National Grid", rated Baa1/P-2) is the holding company for a range of largely regulated businesses focusing on the ownership and operation of electricity and gas networks in the UK and the US.

In the UK, National Grid Electricity Transmission plc ("NGET", rated A3), owns the high-voltage electricity transmission network in England and Wales and operates the system across Great Britain. National Grid Gas plc ("NGG", rated A3) owns and operates the high pressure gas transmission system in Britain and its distribution business delivers gas to 11 million homes and commercial customers.

In the US, National Grid distributes electricity to nearly five million customers in Massachusetts, New Hampshire, New York and Rhode Island. Owning 4,000 megawatts of electricity generation, it is the largest power producer in New York State - carrying power to over one million customers on Long Island. It is also the largest distributor of natural gas in the northeastern US, delivering gas to 3.4 million customers in New York, Massachusetts, New Hampshire and Rhode Island.

National Grid also has a number of related unregulated businesses such as Liquefied Natural Gas importation and storage, property and metering. These operate mostly in the UK and are modest in the context of the group as a whole, accounting for around 5% of revenue and operating profit in the year to March 2012.

Recent Developments

National Grid reported its preliminary results for 2011/12 on 17 May 2012. Excluding an adverse timing impact of GBP256 million, operating profit for the group grew by GBP172 million, or 5%, on a constant currency basis. The higher earnings were largely driven by the UK regulated businesses which benefitted from high retail price index (RPI) inflation, but also a GBP68 million (57%) increase in profit from the Grain LNG, property and UK metering businesses.

On a constant currency basis and excluding timing differences of GBP183 million, operating profit for the US businesses declined by GBP12 million, or 1%, with the benefit of higher regulated income and cost reductions offset by GBP116 million of storm costs. Including storm costs and timing effects, operating profit for the group as a whole declined by 2% in 2011/12 but this must be considered in the context of a 15% increase in the prior year.

In March and April 2012, National Grid submitted updated business plans for its UK transmission and gas distribution businesses to the regulator, Ofgem, as part of the continuing price review process under the regulator's new RIIO (which stands for Revenues = Incentives + Innovation + Outputs) approach. These plans envisage total expenditure over the eight year regulatory period from April 2013 of GBP30 billion for transmission and GBP13 billion for gas distribution, including capex of GBP25 billion and GBP6 billion respectively. The plans also include National Grid's proposals for matters including incentives and transitional arrangements regarding proposed changes to asset depreciation.

Rating Rationale

Moody's rating assessment of National Grid reflects the group's focus on the ownership and operation of electricity and gas networks in the UK and US and takes into account the low business risk of assets operated under well developed regulatory frameworks and strong cash flow generation. The ratings also reflect, as negatives, the capital intensive nature of the group's business, a significant debt burden and the level of shareholder returns.

The ratings are based on Moody's methodologies for (i) Regulated Electric and Gas Utilities published in August 2009 and (ii) complex European utility groups (see European Regulated Utility Groups: Methodology Update, January 2007).

Rating Drivers

The following factors influence National Grid's ratings under Moody's Regulated Electric and Gas Utilities methodology:

FACTOR 1: REGULATORY FRAMEWORK

In the UK, NGG and NGET are subject to regulation by Ofgem whilst National Grid's regulated US subsidiaries are variously subject to regulation by FERC, New York PSC ("NY PSC"), Massachusetts DPU, Rhode Island PUC and New Hampshire PUC.

There are some similarities between the regulatory regimes in the US and UK. For example, each is based on a building block approach intended to allow the regulated entity to recover its operating costs, pay tax, receive regulatory depreciation and earn a return on past investments. However, there are important differences: (i) the US system is often based on historic rather than prospective costs although this is not the case in New York and Rhode Island; (ii) returns are determined on a nominal basis in the US but a real basis in the UK; (iii) US regulators take account of the actual rather than a notional capital structure; and (iv) US utilities are able to make full or partial filings as necessary rather than being bound by a fixed regulatory timetable as is the case in the UK. We note also that the US system is quasi-judicial with multiple parties including government bodies and officials, consumer advocacy groups and various energy consumers, who have differing concerns, but generally a common objective of limiting rate increases.

Whilst noting that prices from 2013 will be set under the new RII framework, Moody's considers the regulatory regime in the UK to be stable and predictable with a track record that demonstrates a high degree of transparency and hence limited regulatory uncertainty. For NGG and NGET, we assign a score of Aaa for Regulatory Framework. This is consistent with the score assigned for the stability and predictability of the regulatory regime for other regulated network businesses in the UK.

National Grid's US operating subsidiaries benefit from well developed regulatory frameworks but they are not considered by Moody's to be as predictable or transparent as the regime in the UK. In particular there is evidence of some inconsistency or unpredictability in their application inter alia due to political considerations or pressure. On this basis, we assign a score of Baa for Regulatory Framework for the US subsidiaries and a blended score of Aa for the group as a whole for this rating factor.

FACTOR 2: ABILITY TO RECOVER COSTS AND EARN RETURNS

National Grid's ability to recover its costs and earn returns differs across the different subsidiaries and regulatory jurisdictions although, further to our comments on the different regulatory frameworks, the extent of the variation is limited. In the UK, NGG and NGET benefit from a tariff formula that allows for the recovery of efficient expenditure and depreciation set by Ofgem at periodic reviews. Rate/tariff reviews and cost recovery in the US is considered to be fairly predictable with new plans providing a generally fair return on investments with limited instances of regulator challenge.

In the past, National Grid has seen poor returns from its US businesses as higher than anticipated capital expenditure and operating costs reduced the achieved return on equity ("RoE") under old rate plans, in some cases to levels below 5%. Since 2008, however, new rate cases have come into effect for all of National Grid's US rate base and the group has been largely but not wholly successful in meeting its goals including RoE, revenue decoupling, pension and other true ups and capex trackers. As a result of the new plans and cost cutting, achieved RoE increased to 8.8% in 2011 as compared to 6.9% in 2009, but remains somewhat below the allowed 9.9% for the US operations as a whole and the 11.3% reported return for the group. We observe that reported returns in the US have also benefitted from a re-classification of regulated assets to outside the regulatory rate base (USD1.9 billion of regulated assets are now classified as outside the USD14.5 billion rate base).

The group continues to make rate case filings in the US as it seeks to further improve returns. In April, National Grid filed with the NY PSC in respect of the Niagara Mohawk gas and electricity businesses, which together comprise around one third of the US rate base. Despite rate plans that came into effect quite recently -- May 2009 for gas and January 2011 for electric -- achieved returns were a modest 6.5% (gas) and 5.6% (electric) in 2011. In April, the group also filed new rate cases for its Rhode Island gas and electric operations.

We assign a score of A for Ability to Recover Costs and Earn Returns under the methodology on a blended basis. This score recognises that rate/tariff review outcomes across the group are fairly predictable with a generally fair return on investments albeit there is a tendency toward politically motivated challenge or intervention in the US which would result in some of those subsidiaries being scored in the Baa category for this factor. A majority of the issuers covered by the methodology are scored in the A/Baa categories.

FACTOR 3: DIVERSIFICATION

Diversification is considered under the Regulated Electric and Gas Methodology as, in general, a balance among several different businesses, geographic regions or regulatory regimes reduces the risk that a company will experience a sudden or rapid deterioration in its overall creditworthiness because of an adverse development specific to any one part of its operation.

National Grid has material operations in gas transmission and distribution, electricity transmission, distribution and generation across a number of different regions and regulatory regimes and thus enjoys the benefit of significant diversification. We thus assign a score of Aa for this factor .

FACTOR 4: FINANCIAL STRENGTH AND LIQUIDITY

National Grid demonstrated solid performance in terms of its key financial metrics for the year to March 2011, reflecting the emerging benefit of new US rate cases (albeit largely offset by higher post-retirement costs and depreciation) but also timing differences, which accounted for GBP433 million of the GBP476 million of growth in operating profit for the year. Key ratios for the year also benefitted from receipt of the GBP3.2 billion rights issue proceeds and also the impact of a weakening USD/GBP exchange rate on the group's USD denominated debt. However, the group reported only a 2% reduction in net finance costs for FY11 with higher interest charges for the group's index-linked debt offsetting the reduction in net debt due to the rights issue.

The credit metrics for National Grid under the Regulated Electric and Gas Methodology result in scores in the Baa range.

As was the case prior to the introduction of the Regulated Electric and Gas Methodology, we will continue to focus on the RCF/Net Debt and FFO Interest Cover ratios for the group as a whole. Moody's considers that these two metrics effectively capture the group's financial performance and allow the rating agency to provide clear guidance to the group and the market. Moody's guidance for the group's current ratings are FFO interest cover of at least 3.0x and RCF to Net Debt of at least 9.0%.

In its analysis, Moody's also considers the debt capacity of the group. We calculate the excess debt capacity at each operating company i.e. debt capacity at the current rating level less the amount of debt then outstanding. We then compare the aggregate debt capacity across all of the operating companies with the debt at National Grid plc to see if it is adequately supported. Our analysis suggested that this was the case as at March 2011 with the rights issue will have providing good headroom.

Liquidity

As at 31 March 2012, National Grid had cash and cash equivalents of GBP299 million, GBP2,391 million of financial investments and around GBP2.0 billion of undrawn committed bank facilities.

National Grid enjoys good access to the capital markets. Issuance was limited during FY12 following receipt of the rights issue proceeds but is expected to increase in the current financial year.

National Grid's liquidity profile is generally characterised by cash inflows from dividends and intercompany interest from its regulatory ring fenced subsidiaries. These cash streams fund the company's dividend and interest, although the latter is predominantly serviced from USD cash streams derived from the US operations. The regulatory frameworks in the US and the UK provide some degree of restriction in terms of dividend distributions, whereby lock-ups will usually be triggered as soon as the operating entity is at the risk of losing its investment-grade rating. For the US subsidiaries also certain leverage levels are applied, which if breached would trigger distribution lock-ups. As such these dividend inflows are of less quality to the group than actual cash reserves, but Moody's acknowledges that at current rating and leverage levels there remains adequate headroom for dividend payments from the operating subsidiaries.

Moody's notes National Grid's large capital programme. For the financial year ending March 2012, the group invested a total of GBP3.4 billion. Capital investment for the current financial year is expected to be in the range of GBP3.5 to 3.8 billion with future growth driven by the need for asset replacement, but also changes in sources of gas supply and electricity generation. The management of the capital programme and the associated funding is considered a key challenge for the group, as the plan relates largely to non-discretionary capex.

National Grid has US CP programmes (USD5.0 billion) and an ECP programme (USD1.5 billion), which are utilised for working capital management and to help hedge the group's US investments exposure. As of 31 March 2012 there

was no outstanding issuance under the programmes. Moody's notes management's treasury policy to limit issuance at any one time to the amount of its committed back-up facilities, to the extent that these lines are not already utilised to back up issuance by National Grid USA, National Grid Holdings Inc, NGET or NGG.

Structural Considerations

National Grid's assigned Baa1/P-2 ratings take into account structural subordination of current and future anticipated debt. The ratings thereby reflect bondholders' distance from the operating companies' cash flows, the size of current and anticipated future debt carried by the operating entities and the possible negative consequences of the regulatory ring-fencing applicable to the UK operating companies for bondholders at National Grid. Moody's notches the holding company by one notch down from the consolidated group's credit quality, which is seen in the low A range, in line with the methodology grid implied A3 rating shown in the table below.

Rating Outlook

The 2010 rights issue strengthened National Grid's balance sheet, establishing a degree of headroom within the current rating categories which has, in recent years, been absent. This headroom is, however, expected to be eroded over the medium term by the continuing capital investment programme and dividend payments.

What Could Change the Rating - Up

Moody's considers upward rating pressure is unlikely in the medium term. As mentioned, the 2010 rights issue left National Grid and its subsidiaries better positioned in their rating categories but Moody's notes that the group's large capital investment programme for the UK and the possibility of additional investment in the US (above and beyond what is currently planned) will most likely reduce financial flexibility over time. The rating agency further considers that the group will favour using free cash flow to fund shareholder distributions and/or support growth rather than to reduce gearing. We note, as a positive, that the group intends to increase dividends for the current year by 4% as compared to the 8% annual growth over recent years.

What Could Change the Rating - Down

Moody's anticipates that National Grid will demonstrate that it is able to achieve ratios of (i) consolidated RCF to Net Debt in excess of 9.0% and (ii) FFO Interest Cover in excess of 3.0x in the current financial year and beyond and a failure to do so would likely lead to negative rating pressure.

We anticipate that any large expansion of the capital investment programme or material acquisitions will be supported by balance sheet strengthening.

Related Criteria And Research

National Grid PLC

Major Rating Factors

Strengths:

- Consistent focus on low-risk electricity and natural gas transmission and distribution operations.
- Predictable revenues and cash flows from regulated activities, which account for over 97% of operating profits.
- Operating, market, and regulatory diversity in the U.K. and the U.S.
- Supportive regulatory environments.
- Proven track record of managing large acquisitions.

Corporate Credit Rating

A-/Stable/A-2

Weaknesses:

- High consolidated financial leverage as a result of previous acquisitions.
- Substantial capital expenditures and dividends that will likely result in negative free cash flows over the medium term.
- Regulatory reset risk in the U.K. and the U.S.
- Exposure to foreign exchange risk and inflation, which add volatility to adjusted credit measures.

Rationale

The ratings on U.K.-based gas and electricity network operator National Grid PLC (NG) and its subsidiaries reflect Standard & Poor's Ratings Services' view of the strong and predictable cash flows from the group's low-risk electricity and gas network operations in the U.K. and the U.S.; regulatory regimes in each of those countries that we consider to be broadly supportive of credit quality; a consistently applied strategic and financial policy; and a proven track record of managing large acquisitions.

These strengths are offset by NG's relatively high financial leverage; a substantial capital expenditures (capex) program and as yet unchanged dividend policy, which together will likely result in negative free cash flows over the medium term; regulatory reset risk in the U.S. and the U.K.; and exposure to foreign exchange risks and inflation, which add volatility to Standard & Poor's-adjusted credit measures.

Key business and profitability developments

NG reported a robust set of results for the 12 months ended March 31, 2011, with operating profit before exceptional items up by 15% year on year, to £3.6 billion. This increase was mainly driven by one-off items of £433 million that will not recur this year. Pretax profit increased by 25% over the same period, and financing costs fell by 2% as higher costs related to the effect of inflation in the U.K. on the indexation of inflation-linked debt (about 30% of NG's long-term debt) were offset by lower net pension charges and lower overall net debt. The latter reflected the benefit of the cash proceeds from a rights issue announced in May 2010.

We believe that NG's results will return to more moderate levels of growth in the next financial year. In our view, the increase in inflation in 2010-2011 will be reflected in higher inflation-linked regulated revenues in 2011-2012, which will be partially offset by an increase in financing costs on inflation-linked debt.

NG's business risk has not materially changed over the past 12 months, in our view. The group remains focused on owning and operating regulated network assets in the U.K. and U.S., which account for over 97% of consolidated operating profit. NG faces some regulatory reset risk in the U.S., and U.S. revenues remain subject to an element of volume risk, although this has significantly diminished as rate plans that protect NG from fluctuations in volumes sold have been renewed. In an effort to increase returns in the U.S. and become more efficient, NG recently announced a restructuring program. The plan involves a regional focus and a reduction in operating costs of about \$200 million by March 31, 2012, achieved mainly through a 7% reduction of the U.S. workforce.

The group also remains exposed to risks arising from regulatory reset in the U.K. (currently every five years). The next price control period starts in April 2013, is expected to last for eight years, and is currently under consultation at the industry regulator, the Office of Gas and Electricity Markets (Ofgem). For further information on the next price control period, see: "Credit FAQ: How The Proposed RIIO Regulatory Framework Could Affect Ratings On U.K. Energy Utilities," published Sept. 13, 2011, on RatingsDirect on the Global Credit Portal.

On Jan. 20, 2011, the New York Public Service Commission authorized a \$112.7 million (3.6%) electricity rate hike, about 31% of the revised amount sought by Niagara Mohawk. Niagara Mohawk represents less than 10% of NG's operating income and about 30% of its U.S. operating income and therefore, in our opinion, the rate order will not have a material effect on the credit quality of the consolidated entity.

Key cash flow and capital-structure developments

NG's robust performance in 2010-2011 resulted in strengthened credit metrics for the group. Reported operating cash flow in the 12 months to March 31, 2011, was up 12% to £4.7 billion, while reported net debt fell to £18.7 billion from £22.1 billion a year ago. The reduction in net debt reflects £3.2 billion of cash from the rights issue and the effect of the weakening of the U.S. dollar-British pound sterling exchange rate on the U.S. dollar-denominated debt, partly offset by capital investment.

Consequently, NG's adjusted funds from operations (FFO)-to-debt ratio was about 17% in the 12 months to March 31, 2011, which compares positively with the rating threshold of more than 12%.

On May 20, 2010, NG announced a £3.2 billion rights issue to support funding for a significant increase in the group's capex program. The program allows for £22 billion of capex in the next five years, compared with £14 billion in the five years to March 31, 2010. We continue to expect the rights issue to position NG more comfortably within the existing ratings, and to provide a degree of headroom that was previously lacking. In our opinion, the rights issue also underlines NG's stated commitment of maintaining an 'A' category rating for its U.K. operating subsidiaries.

Liquidity

The 'A-2' short-term rating on NG, National Grid USA (NG USA; A-/Stable/A-2), and subsidiaries, is 'A-2'. This largely reflects the companies' long-term corporate credit ratings and our view of the group's adequate liquidity. Projected sources of liquidity (mainly operating cash flow and available bank lines), exceed projected uses (mainly necessary capex, debt maturities, and dividends) by more than 1.2x. NG's ability to absorb high-impact, low-probability events and retain a limited need for refinancing; its flexibility to reduce capital spending or sell assets; its sound bank relationships; its solid standing in credit markets; and its generally prudent risk management further support our opinion of liquidity as adequate.

Our assessment of NG's adequate liquidity is also underpinned by its:

- Access to unrestricted short-term cash and short-term marketable securities of about £2.9 billion as of June 30, 2011;
- Undrawn £2.7 billion committed credit facilities with a maturity longer than 12 months; and
- Our expectation that NG will generate modest and slightly higher adjusted funds from operations (FFO) in 2011-2012 than in 2010-2011, when it was about €3.6 billion.

This compares with our forecast that, in 2011-2012, NG faces:

- About £3.6 billion in capital expenditures;
- Dividend payments of about £1.0 billion; and
- £1.7 billion in short-term debt maturing over the next 12 months.

We understand that there are no restrictive covenants in the documentation attached to the group's debt.

Outlook

The stable outlook reflects our view that the group's operational and financial performances will continue to be solid. It also reflects our belief that NG will continue to focus on its regulated gas and electricity network businesses in the U.K. and the U.S., while maintaining consolidated, adjusted FFO to total debt of more than 12%.

Ratings downside could occur if NG's financial performance were to deviate materially from our forecasts without the implementation of offsetting measures, or if the group were to undertake a significant acquisition. In that regard, if consolidated FFO to total debt were to decline to 10%-11% due to higher capital outlays and acquisitions, and associated debt financing, we could lower the ratings.

Although we view the May 2010 rights issue as providing a more comfortable degree of headroom than existed previously at the current rating level, we continue to view ratings upside as unlikely because of NG's ambitious capex plans and our forecast for its financial performance.

Business Description

NG is a U.K.-based, investor-owned utility. It owns and operates the high-voltage electricity transmission system in England and Wales through its subsidiary National Grid Electricity Transmission PLC (NGET; A-/Stable/A-2); and the U.K. gas transmission network and four local gas distribution networks (GDNs) through its subsidiary National Grid Gas PLC (NGG; A-/Stable/A-2). Following the acquisition of KeySpan in 2007, NG is also, through NG USA, the second-largest utility in the U.S. by number of customers. NG USA has a significant presence in electricity transmission and distribution and gas distribution in the north-eastern U.S. states of Massachusetts, Rhode Island, New York, and New Hampshire.

NG directly serves about 19 million customers in both markets, and employs more than 28,000 people. In the financial year ending March 31, 2011, NG reported revenues of £14.34 billion, with operating profit before exceptional items up by 15%, year on year, to £3.6 billion. However, this increase was mainly driven by one-off items of £433 million that will not recur next year.

Rating Methodology

In accordance with our parent-subsidary rating criteria, the ratings on NG and its subsidiaries reflect the consolidated corporate credit profile of the whole group, including the operating companies NGET, NGG, and the subsidiaries of NG USA. We rate the long-term debt at the holding company level at 'BBB+', one notch below the corporate credit rating, to reflect the structural subordination of holding company debt to operating company liabilities. Structural subordination affects debt or guarantees issued at NG, NG USA, and NGG Finance PLC (not rated; guaranteed by National Grid Holdings One PLC and NG).

Business Risk Profile: Excellent; With Stable And Predictable Cash Flow From Regulated Businesses, And Good-Quality Operations

The major strengths of NG's excellent business risk profile are:

- NG's credit quality, which is underpinned by the strong, stable economies in which the group operates and the favorable regulation that offsets demand volatility. Virtually all of NG's operating profits come from the U.K. and the U.S.
- The contribution of stable and predictable cash flows from regulated networks, which generate over 97% of the group's earnings. Although regulation varies between U.K. and U.S., the regulatory regimes are transparent and generally supportive of credit quality.
- NG's solid operating performance and frequent outperformance of efficiency targets, along with its good track record of cost reduction and successful integration following acquisitions or mergers. NG met or exceeded most of its operational targets in 2010-2011. Under the U.K. regulatory framework, NG achieved system reliability of 99% in electricity and 100% in gas transmission, as in previous years. Similarly, there were no reliability issues in U.K. gas distribution. In U.S. transmission and distribution, NG fully met its targets for network reliability.
- The fact that the U.K. business's remuneration is based on cost plus a margin and is not a function of electricity or gas demand. This has been a supporting factor during the recession of the past few years. Future operating profit margins are, however, mostly reliant on NG's ability to control costs while managing capital projects required to sustain or improve network quality and match performance requirements.

These strengths are mitigated by the following constraints:

- Uncertainty about the effects of the new U.K. transmission and distribution regulatory framework. As part of the regulatory review for the RIIO (revenue = incentives + innovation + outputs) model, Ofgem published a decision that the lives of new electricity distribution assets will depreciate over 40 years, as opposed to 20 years previously. This change will take effect at the start of the next regulatory period on April 1, 2013. We think that the slow depreciation of assets will constrain cash flow generation in the medium term, although to a different extent for each network operator. At the same time, the slow depreciation should reduce leverage in terms of debt to regulatory capital value. We do not yet factor the proposed regulatory changes into our ratings for two reasons: First, the overall effect will depend on the overall package of regulatory decisions; and second, Ofgem has stated its willingness to consider transitional arrangements to reduce the impact of the changes.
- Substantial capex of about £22 billion over the next five years. This is likely to increase operational challenges in the short term, but should lead to operational improvements in the medium to long term. The capex, of which about £15 billion is to be used in the U.K. regulated business, is driven by the need to reconfigure the electricity

transmission network to handle large quantities of intermittent renewable power and to remodel the gas network to accommodate an increase in imports, especially liquefied natural gas.

- NG's highly acquisitive strategy, including in nondomestic markets. However, the group has so far demonstrated a good track record of cost reduction and successful integration following acquisitions or mergers.
- Regulatory reset risk and volume risk in the U.S. Historically, regulation has been reasonably supportive of creditworthiness, but long-term rate plans, rate moratoriums, and regulatory lag have resulted in earned returns that are below the national average in most jurisdictions. U.S. revenues also remain subject to an element of volume risk. We believe that the subsidiaries' ability to manage regulatory risk remains critical to credit quality.

Financial Risk Profile: Significant; With High Leverage Levels And Material Capex Requirements

The main weaknesses of NG's significant financial risk profile are:

- High consolidated financial leverage as a result of previous acquisitions.
- Negative cash flow generation, which we anticipate over the next five years, due to the group's large capex program (£22 billion to 2015) and dividend payments. However, we also anticipate that NG will maintain adjusted FFO to debt above our 12% guidance for the rating.
- An aggressive policy of raising dividends by about 8% annually, resulting in a payout ratio of about 68% as of March 31, 2010.
- Exposure to foreign exchange risk and inflation, which add volatility to adjusted credit measures. NG mitigates currency risk on its cash flows by matching the currency of its debt, although it remains exposed to translation risk. A high retail price index increases the amount of inflation-linked debt indexation that we deduct from FFO in accordance with our criteria.

These weaknesses are partially mitigated by:

- A significant degree of cash flow predictability, since regulated businesses generate 95% of the group's cash flow.
- A publicly stated aim to maintain the current rating. Management is therefore committed to maintaining adjusted FFO to debt of more than 12%. The recent rights issue underlines NG's unchanged goal of maintaining an 'A' category rating for its U.K. operating subsidiaries.
- NG's good access to bank financing and the capital markets, with funding sources being well-diversified. The group was able to maintain full access to the bond markets during the financial crisis, and its recent £3.2 billion rights issue was fully underwritten.

Financial Statistics/Adjustments

NG's last full, consolidated accounts, for the financial year to March 31, 2011, were prepared according to International Financial Reporting Standards. We make a number of adjustments to NG's reported figures. The adjustments for financial 2010-2011 are shown in table 1. The most important are as follows:

- We add to debt operating lease liabilities of £593.3 million, representing the present value of future operating lease obligations.
- We also add to debt postretirement benefit obligations of £1,198 million. We view pension deficits as debt-like obligations.

- We subtract surplus cash of £2,938 million from debt. This comprises unrestricted cash and marketable securities, and investments in short-term money market funds.
- In line with our criteria, we also subtract from debt the difference between the debt shown on the balance sheet, and the value of debt that is locked in through principal hedges. Therefore we subtract a positive value of principal hedges on currency derivatives of £1.1 billion from debt. This amount reflects the difference between reported debt and the value of foreign currency debt that has been locked into maturity through currency derivatives.
- We subtract from cash flow from operations £238 million of replacement expenditure (repex), representing the reclassification of 50% of repex from capex to operating expenditure. This adjustment reflects the regulatory treatment of repex.
- We subtract from FFO indexation of £248 million, in line with our criteria for inflation-linked debt (see "New Methodology For Inflation-Linked Debt Has No Immediate Effect On Ratings On U.K. Regulated Utilities," published April 8, 2009).

The Narragansett Electric Company
d/b/a National Grid
Division Docket No. D-12-12
In re: Application for Long-Term Debt Issuance
Responses to Division's First Set of Data Requests
Issued May 30, 2012

Division 1-2

Request:

Please provide Narragansett Electric's capital structure policies and percentage targets and the basis for those targets.

Response:

The Company targets a capital structure consisting of approximately 50 percent equity and 50 percent debt. These targets are determined in line with the Company's credit and risk profile.

The Narragansett Electric Company
d/b/a National Grid
Division Docket No. D-12-12
In re: Application for Long-Term Debt Issuance
Responses to Division's First Set of Data Requests
Issued May 30, 2012

Division 1-3

Request:

Please provide a description of Narragansett Electric's dividend policy.

Response:

National Grid's finance organization makes recommendations to the Company's Board of Directors as to the amount and timing of dividends paid by the Company. These recommendations are based on an evaluation of the Company's financial condition and capital structure requirements among other considerations. The Company's Board of Directors evaluates the Company's stand-alone financial position before approving, modifying or rejecting these recommendations.

FERC FINANCIAL REPORT

FERC FORM No. 1: Annual Report of Major Electric Utilities, Licensees and Others and Supplemental Form 3-Q: Quarterly Financial Report

These reports are mandatory under the Federal Power Act, Sections 3, 4(a), 304 and 309, and 18 CFR 141.1 and 141.400. Failure to report may result in criminal fines, civil penalties and other sanctions as provided by law. The Federal Energy Regulatory Commission does not consider these reports to be of confidential nature

|--------------------------------------------------------------------------------------|-------------------------------------------------------|

INSTRUCTIONS FOR FILING FERC FORM NOS. 1 and 3-Q

GENERAL INFORMATION

I. Purpose

FERC Form No. 1 (FERC Form 1) is an annual regulatory requirement for Major electric utilities, licensees and others (18 C.F.R. § 141.1). FERC Form No. 3-Q (FERC Form 3-Q) is a quarterly regulatory requirement which supplements the annual financial reporting requirement (18 C.F.R. § 141.400). These reports are designed to collect financial and operational information from electric utilities, licensees and others subject to the jurisdiction of the Federal Energy Regulatory Commission. These reports are also considered to be non-confidential public use forms.

II. Who Must Submit

Each Major electric utility, licensee, or other, as classified in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees Subject To the Provisions of The Federal Power Act (18 C.F.R. Part 101), must submit FERC Form 1 (18 C.F.R. § 141.1), and FERC Form 3-Q (18 C.F.R. § 141.400).

Note: Major means having, in each of the three previous calendar years, sales or transmission service that exceeds one of the following:

- (1) one million megawatt hours of total annual sales,
- (2) 100 megawatt hours of annual sales for resale,
- (3) 500 megawatt hours of annual power exchanges delivered, or
- (4) 500 megawatt hours of annual wheeling for others (deliveries plus losses).

III. What and Where to Submit

(a) Submit FERC Forms 1 and 3-Q electronically through the forms submission software. Retain one copy of each report for your files. Any electronic submission must be created by using the forms submission software provided free by the Commission at its web site: <http://www.ferc.gov/docs-filing/eforms/form-1/elec-subm-soft.asp>. The software is used to submit the electronic filing to the Commission via the Internet.

(b) The Corporate Officer Certification must be submitted electronically as part of the FERC Forms 1 and 3-Q filings.

(c) Submit immediately upon publication, by either eFiling or mail, two (2) copies to the Secretary of the Commission, the latest Annual Report to Stockholders. Unless eFiling the Annual Report to Stockholders, mail the stockholders report to the Secretary of the Commission at:

Secretary
Federal Energy Regulatory Commission
888 First Street, NE
Washington, DC 20426

(d) For the CPA Certification Statement, submit within 30 days after filing the FERC Form 1, a letter or report (not applicable to filers classified as Class C or Class D prior to January 1, 1984). The CPA Certification Statement can be either eFiled or mailed to the Secretary of the Commission at the address above.

The CPA Certification Statement should:

- a) Attest to the conformity, in all material aspects, of the below listed (schedules and pages) with the Commission's applicable Uniform System of Accounts (including applicable notes relating thereto and the Chief Accountant's published accounting releases), and
- b) Be signed by independent certified public accountants or an independent licensed public accountant certified or licensed by a regulatory authority of a State or other political subdivision of the U. S. (See 18 C.F.R. §§ 41.10-41.12 for specific qualifications.)

| Statement of Cash Flows | 120-121 |
| Notes to Financial Statements | 122-123 |

- e) The following format must be used for the CPA Certification Statement unless unusual circumstances or conditions, explained in the letter or report, demand that it be varied. Insert parenthetical phrases only when exceptions are reported.

"In connection with our regular examination of the financial statements of _____ for the year ended on which we have reported separately under date of _____, we have also reviewed schedules _____ of FERC Form No. 1 for the year filed with the Federal Energy Regulatory Commission, for conformity in all material respects with the requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases. Our review for this purpose included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

Based on our review, in our opinion the accompanying schedules identified in the preceding paragraph (except as noted below) conform in all material respects with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases."

The letter or report must state which, if any, of the pages above do not conform to the Commission's requirements. Describe the discrepancies that exist.

- (f) Filers are encouraged to file their Annual Report to Stockholders, and the CPA Certification Statement using eFiling. To further that effort, new selections, "Annual Report to Stockholders," and "CPA Certification Statement" have been added to the dropdown "pick list" from which companies must choose when eFiling. Further instructions are found on the Commission's website at <http://www.ferc.gov/help/how-to.asp>.

- (g) Federal, State and Local Governments and other authorized users may obtain additional blank copies of FERC Form 1 and 3-Q free of charge from <http://www.ferc.gov/docs-filing/eforms/form-1/form-1.pdf> and <http://www.ferc.gov/docs-filing/eforms.asp#3Q-gas>.

IV. When to Submit:

FERC Forms 1 and 3-Q must be filed by the following schedule:

- a) FERC Form 1 for each year ending December 31 must be filed by April 18th of the following year (18 CFR § 141.1), and
- b) FERC Form 3-Q for each calendar quarter must be filed within 60 days after the reporting quarter (18 C.F.R. § 141.400).

V. Where to Send Comments on Public Reporting Burden.

The public reporting burden for the FERC Form 1 collection of information is estimated to average 1,144 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data-needed, and completing and reviewing the collection of information. The public reporting burden for the FERC Form 3-Q collection of information is estimated to average 150 hours per response.

Send comments regarding these burden estimates or any aspect of these collections of information, including suggestions for reducing burden, to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426 (Attention: Information Clearance Officer); and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission). No person shall be subject to any penalty if any collection of information does not display a valid control number (44 U.S.C. § 3512 (a)).

GENERAL INSTRUCTIONS

- I. Prepare this report in conformity with the Uniform System of Accounts (18 CFR Part 101) (USofA). Interpret all accounting words and phrases in accordance with the USofA.
- II. Enter in whole numbers (dollars or MWH) only, except where otherwise noted. (Enter cents for averages and figures per unit where cents are important. The truncating of cents is allowed except on the four basic financial statements where rounding is required.) The amounts shown on all supporting pages must agree with the amounts entered on the statements that they support. When applying thresholds to determine significance for reporting purposes, use for balance sheet accounts the balances at the end of the current reporting period, and use for statement of income accounts the current year's year to date amounts.
- III. Complete each question fully and accurately, even if it has been answered in a previous report. Enter the word "None" where it truly and completely states the fact.
- IV. For any page(s) that is not applicable to the respondent, omit the page(s) and enter "NA," "NONE," or "Not Applicable" in column (d) on the List of Schedules, pages 2 and 3.
- V. Enter the month, day, and year for all dates. Use customary abbreviations. **The "Date of Report" included in the header of each page is to be completed only for resubmissions** (see VII. below).
- VI. Generally, except for certain schedules, all numbers, whether they are expected to be debits or credits, must be reported as positive. Numbers having a sign that is different from the expected sign must be reported by enclosing the numbers in parentheses.
- VII. For any resubmissions, submit the electronic filing using the form submission software only. Please explain the reason for the resubmission in a footnote to the data field.
- VIII. Do not make references to reports of previous periods/years or to other reports in lieu of required entries, except as specifically authorized.
- IX. Wherever (schedule) pages refer to figures from a previous period/year, the figures reported must be based upon those shown by the report of the previous period/year, or an appropriate explanation given as to why the different figures were used.

Definitions for statistical classifications used for completing schedules for transmission system reporting are as follows:

FNS - Firm Network Transmission Service for Self. "Firm" means service that can not be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Network Service" is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff. "Self" means the respondent.

FNO - Firm Network Service for Others. "Firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Network Service" is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff.

LFP - for Long-Term Firm Point-to-Point Transmission Reservations. "Long-Term" means one year or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Point-to-Point Transmission Reservations" are described in Order No. 888 and the Open Access Transmission Tariff. For all transactions identified as LFP, provide in a footnote the

termination date of the contract defined as the earliest date either buyer or seller can unilaterally cancel the contract.

OLF - Other Long-Term Firm Transmission Service. Report service provided under contracts which do not conform to the terms of the Open Access Transmission Tariff. "Long-Term" means one year or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. For all transactions identified as OLF, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally get out of the contract.

SFP - Short-Term Firm Point-to-Point Transmission Reservations. Use this classification for all firm point-to-point transmission reservations, where the duration of each period of reservation is less than one-year.

NF - Non-Firm Transmission Service, where firm means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions.

OS - Other Transmission Service. Use this classification only for those services which can not be placed in the above-mentioned classifications, such as all other service regardless of the length of the contract and service FERC Form. Describe the type of service in a footnote for each entry.

AD - Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment.

DEFINITIONS

I. Commission Authorization (Comm. Auth.) -- The authorization of the Federal Energy Regulatory Commission, or any other Commission. Name the commission whose authorization was obtained and give date of the authorization.

II. Respondent -- The person, corporation, licensee, agency, authority, or other Legal entity or instrumentality in whose behalf the report is made.

EXCERPTS FROM THE LAW

Federal Power Act, 16 U.S.C. § 791a-825r

Sec. 3. The words defined in this section shall have the following meanings for purposes of this Act, to with:

(3) 'Corporation' means any corporation, joint-stock company, partnership, association, business trust, organized group of persons, whether incorporated or not, or a receiver or receivers, trustee or trustees of any of the foregoing. It shall not include 'municipalities, as hereinafter defined;

(4) 'Person' means an individual or a corporation;

(5) 'Licensee, means any person, State, or municipality Licensed under the provisions of section 4 of this Act, and any assignee or successor in interest thereof;

(7) 'municipality means a city, county, irrigation district, drainage district, or other political subdivision or agency of a State competent under the Laws thereof to carry and the business of developing, transmitting, unitizing, or distributing power;

(11) "project' means. a complete unit of improvement or development, consisting of a power house, all water conduits, all dams and appurtenant works and structures (including navigation structures) which are a part of said unit, and all storage, diverting, or fore bay reservoirs directly connected therewith, the primary line or lines transmitting power there from to the point of junction with the distribution system or with the interconnected primary transmission system, all miscellaneous structures used and useful in connection with said unit or any part thereof, and all water rights, rights-of-way, ditches, dams, reservoirs, Lands, or interest in Lands the use and occupancy of which are necessary or appropriate in the maintenance and operation of such unit;

"Sec. 4. The Commission is hereby authorized and empowered

(a) To make investigations and to collect and record data concerning the utilization of the water 'resources of any region to be developed, the water-power industry and its relation to other industries and to interstate or foreign commerce, and concerning the location, capacity, development -costs, and relation to markets of power sites; ... to the extent the Commission may deem necessary or useful for the purposes of this Act."

"Sec. 304. (a) Every Licensee and every public utility shall file with the Commission such annual and other periodic or special* reports as the Commission may be rules and regulations or other prescribe as necessary or appropriate to assist the Commission in the -proper administration of this Act. The Commission may prescribe the manner and FERC Form in which such reports salt be made, and require from such persons specific answers to all questions upon which the Commission may need information. The Commission may require that such reports shall include, among other things, full information as to assets and Liabilities, capitalization, net investment, and reduction thereof, gross receipts, interest due and paid, depreciation, and other reserves, cost of project and other facilities, cost of maintenance and operation of the project and other facilities, cost of renewals and replacement of the project works and other facilities, depreciation, generation, transmission, distribution, delivery, use, and sale of electric energy. The Commission may require any such person to make adequate provision for currently determining such costs and other facts. Such reports shall be made under oath unless the Commission otherwise specifies*.10

"Sec. 309. The Commission shall have power to perform any and all acts, and to prescribe, issue, make, and rescind such orders, rules and regulations as it may find necessary or appropriate to carry out the provisions of this Act. Among other things, such rules and regulations may define accounting, technical, and trade terms used in this Act; and may prescribe the FERC Form or FERC Forms of all statements, declarations, applications, and reports to be filed with the Commission, the information which they shall contain, and the time within which they shall be filed..."

General Penalties

The Commission may assess up to \$1 million per day per violation of its rules and regulations. *See* FPA § 316(a) (2005), 16 U.S.C. § 825o(a).

CORPORATIONS CONTROLLED BY RESPONDENT

1. Report below the names of all corporations, business trusts, and similar organizations, controlled directly or indirectly by respondent at any time during the year. If control ceased prior to end of year, give particulars (details) in a footnote.

2. If control was by other means than a direct holding of voting rights, state in a footnote the manner in which control was held, naming any intermediaries involved.

3. If control was held jointly with one or more other interests, state the fact in a footnote and name the other interests.

Definitions

1. See the Uniform System of Accounts for a definition of control.

2. Direct control is that which is exercised without interposition of an intermediary.

3. Indirect control is that which is exercised by the interposition of an intermediary which exercises direct control.

4. Joint control is that in which neither interest can effectively control or direct action without the consent of the other, as where the voting control is equally divided between two holders, or each party holds a veto power over the other. Joint control may exist by mutual agreement or understanding between two or more parties who together have control within the meaning of the definition of control in the Uniform System of Accounts, regardless of the relative voting rights of each party.

| INFORMATION ON FORMULA RATES Formula Rate Variances | | | | |
| 1. If a respondent does not submit such filings then indicate in a footnote to the applicable Form 1 schedule where formula rate inputs differ from amounts reported in the Form 1. 2. The footnote should provide a narrative description explaining how the "rate" (or billing) was derived if different from the reported amount in the Form 1. 3. The footnote should explain amounts excluded from the ratebase or where labor or other allocation factors, operating expenses, or other items impacting formula rate inputs differ from amounts reported in Form 1 schedule amounts. 4. Where the Commission has provided guidance on formula rate inputs, the specific proceeding should be noted in the footnote. | | | | |

| IMPORTANT CHANGES DURING THE QUARTER/YEAR | | | |
| <p>Give particulars (details) concerning the matters indicated below. Make the statements explicit and precise, and number them in accordance with the inquiries. Each inquiry should be answered. Enter "none," "not applicable," or "NA" where applicable. If information which answers an inquiry is given elsewhere in the report, make a reference to the schedule in which it appears.</p> <p>1. Changes in and important additions to franchise rights: Describe the actual consideration given therefore and state from whom the franchise rights were acquired. If acquired without the payment of consideration, state that fact.</p> <p>2. Acquisition of ownership in other companies by reorganization, merger, or consolidation with other companies: Give names of companies involved, particulars concerning the transactions, name of the Commission authorizing the transaction, and reference to Commission authorization.</p> <p>3. Purchase or sale of an operating unit or system: Give a brief description of the property, and of the transactions relating thereto, and reference to Commission authorization, if any was required. Give date journal entries called for by the Uniform System of Accounts were submitted to the Commission.</p> <p>4. Important leaseholds (other than leaseholds for natural gas lands) that have been acquired or given, assigned or surrendered: Give effective dates, lengths of terms, names of parties, rents, and other condition. State name of Commission authorizing lease and give reference to such authorization.</p> <p>5. Important extension or reduction of transmission or distribution system: State territory added or relinquished and date operations began or ceased and give reference to Commission authorization, if any was required. State also the approximate number of customers added or lost and approximate annual revenues of each class of service. Each natural gas company must also state major new continuing sources of gas made available to it from purchases, development, purchase contract or otherwise, giving location and approximate total gas volumes available, period of contracts, and other parties to any such arrangements, etc.</p> <p>6. Obligations incurred as a result of issuance of securities or assumption of liabilities or guarantees including issuance of short-term debt and commercial paper having a maturity of one year or less. Give reference to FERC or State Commission authorization, as appropriate, and the amount of obligation or guarantee.</p> <p>7. Changes in articles of incorporation or amendments to charter: Explain the nature and purpose of such changes or amendments.</p> <p>8. State the estimated annual effect and nature of any important wage scale changes during the year.</p> <p>9. State briefly the status of any materially important legal proceedings pending at the end of the year, and the results of any such proceedings culminated during the year.</p> <p>10. Describe briefly any materially important transactions of the respondent not disclosed elsewhere in this report in which an officer, director, security holder reported on Page 104 or 105 of the Annual Report Form No. 1, voting trustee, associated company or known associate of any of these persons was a party or in which any such person had a material interest.</p> <p>11. (Reserved.)</p> <p>12. If the important changes during the year relating to the respondent company appearing in the annual report to stockholders are applicable in every respect and furnish the data required by Instructions 1 to 11 above, such notes may be included on this page.</p> <p>13. Describe fully any changes in officers, directors, major security holders and voting powers of the respondent that may have occurred during the reporting period.</p> <p>14. In the event that the respondent participates in a cash management program(s) and its proprietary capital ratio is less than 30 percent please describe the significant events or transactions causing the proprietary capital ratio to be less than 30 percent, and the extent to which the respondent has amounts loaned or money advanced to its parent, subsidiary, or affiliated companies through a cash management program(s). Additionally, please describe plans, if any to regain at least a 30 percent proprietary ratio.</p> | | | |

| STATEMENT OF INCOME | | | | | | | |
| Quarterly | | | | | | | |
| 1. Report in column (c) the current year to date balance. Column (c) equals the total of adding the data in column (g) plus the data in column (i) plus the data in column (k). Report in column (d) similar data for the previous year. This information is reported in the annual filing only. | | | | | | | |
| 2. Enter in column (e) the balance for the reporting quarter and in column (f) the balance for the same three month period for the prior year. | | | | | | | |
| 3. Report in column (g) the quarter to date amounts for electric utility function; in column (i) the quarter to date amounts for gas utility, and in column (k) the quarter to date amounts for other utility function for the current year quarter. | | | | | | | |
| 4. Report in column (h) the quarter to date amounts for electric utility function; in column (j) the quarter to date amounts for gas utility, and in column (l) the quarter to date amounts for other utility function for the prior year quarter. | | | | | | | |
| 5. If additional columns are needed, place them in a footnote. | | | | | | | |
| Annual or Quarterly if applicable | | | | | | | |
| 5. Do not report fourth quarter data in columns (e) and (f) | | | | | | | |
| 6. Report amounts for accounts 412 and 413, Revenues and Expenses from Utility Plant Leased to Others, in another utility column in a similar manner to a utility department. Spread the amount(s) over lines 2 thru 26 as appropriate. Include these amounts in columns (c) and (d) totals. | | | | | | | |
| 7. Report amounts in account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413 above. | | | | | | | |

| STATEMENT OF INCOME FOR THE YEAR (Continued) | | | | | | | |
| <p>9. Use page 122 for important notes regarding the statement of income for any account thereof.</p> <p>10. Give concise explanations concerning unsettled rate proceedings where a contingency exists such that refunds of a material amount may need to be made to the utility's customers or which may result in material refund to the utility with respect to power or gas purchases. State for each year effected the gross revenues or costs to which the contingency relates and the tax effects together with an explanation of the major factors which affect the rights of the utility to retain such revenues or recover amounts paid with respect to power or gas purchases.</p> <p>11 Give concise explanations concerning significant amounts of any refunds made or received during the year resulting from settlement of any rate proceeding affecting revenues received or costs incurred for power or gas purchases, and a summary of the adjustments made to balance sheet, income, and expense accounts.</p> <p>12. If any notes appearing in the report to stokholders are applicable to the Statement of Income, such notes may be included at page 122.</p> <p>13. Enter on page 122 a concise explanation of only those changes in accounting methods made during the year which had an effect on net income, including the basis of allocations and apportionments from those used in the preceding year. Also, give the appropriate dollar effect of such changes.</p> <p>14. Explain in a footnote if the previous year's/quarter's figures are different from that reported in prior reports.</p> <p>15. If the columns are insufficient for reporting additional utility departments, supply the appropriate account titles report the information in a footnote to this schedule.</p> | | | | | | | |

STATEMENT OF RETAINED EARNINGS

1. Do not report Lines 49-53 on the quarterly version.
2. Report all changes in appropriated retained earnings, unappropriated retained earnings, year to date, and unappropriated undistributed subsidiary earnings for the year.
3. Each credit and debit during the year should be identified as to the retained earnings account in which recorded (Accounts 433, 436 - 439 inclusive). Show the contra primary account affected in column (b)
4. State the purpose and amount of each reservation or appropriation of retained earnings.
5. List first account 439, Adjustments to Retained Earnings, reflecting adjustments to the opening balance of retained earnings. Follow by credit, then debit items in that order.
6. Show dividends for each class and series of capital stock.
7. Show separately the State and Federal income tax effect of items shown in account 439, Adjustments to Retained Earnings.
8. Explain in a footnote the basis for determining the amount reserved or appropriated. If such reservation or appropriation is to be recurrent, state the number and annual amounts to be reserved or appropriated as well as the totals eventually to be accumulated.
9. If any notes appearing in the report to stockholders are applicable to this statement, include them on pages 122-123.

NOTES TO FINANCIAL STATEMENTS

1. Use the space below for important notes regarding the Balance Sheet, Statement of Income for the year, Statement of Retained Earnings for the year, and Statement of Cash Flows, or any account thereof. Classify the notes according to each basic statement, providing a subheading for each statement except where a note is applicable to more than one statement.
2. Furnish particulars (details) as to any significant contingent assets or liabilities existing at end of year, including a brief explanation of any action initiated by the Internal Revenue Service involving possible assessment of additional income taxes of material amount, or of a claim for refund of income taxes of a material amount initiated by the utility. Give also a brief explanation of any dividends in arrears on cumulative preferred stock.
3. For Account 116, Utility Plant Adjustments, explain the origin of such amount, debits and credits during the year, and plan of disposition contemplated, giving references to Commission orders or other authorizations respecting classification of amounts as plant adjustments and requirements as to disposition thereof.
4. Where Accounts 189, Unamortized Loss on Reacquired Debt, and 257, Unamortized Gain on Reacquired Debt, are not used, give an explanation, providing the rate treatment given these items. See General Instruction 17 of the Uniform System of Accounts.
5. Give a concise explanation of any retained earnings restrictions and state the amount of retained earnings affected by such restrictions.
6. If the notes to financial statements relating to the respondent company appearing in the annual report to the stockholders are applicable and furnish the data required by instructions above and on pages 114-121, such notes may be included herein.
7. For the 3Q disclosures, respondent must provide in the notes sufficient disclosures so as to make the interim information not misleading. Disclosures which would substantially duplicate the disclosures contained in the most recent FERC Annual Report may be omitted.
8. For the 3Q disclosures, the disclosures shall be provided where events subsequent to the end of the most recent year have occurred which have a material effect on the respondent. Respondent must include in the notes significant changes since the most recently completed year in such items as: accounting principles and practices; estimates inherent in the preparation of the financial statements; status of long-term contracts; capitalization including significant new borrowings or modifications of existing financing agreements; and changes resulting from business combinations or dispositions. However were material contingencies exist, the disclosure of such matters shall be provided even though a significant change since year end may not have occurred.
9. Finally, if the notes to the financial statements relating to the respondent appearing in the annual report to the stockholders are applicable and furnish the data required by the above instructions, such notes may be included herein.

| The Narragansett Electric Company | | | |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | |

Note 1. Summary of Significant Accounting Policies

A. Nature of Operations

The Narragansett Electric Company (the "Company," "we," "us," and "our") is a retail distribution company providing electric service to approximately 489,000 customers and gas service to approximately 249,000 customers in 38 cities and towns in Rhode Island. The Company's service area covers approximately 99% of Rhode Island.

The Company is a wholly-owned subsidiary of National Grid USA ("NGUSA"), a public utility holding company with regulated subsidiaries engaged in the generation of electricity and the transmission, distribution and sale of both natural gas and electricity. NGUSA is an indirectly-owned subsidiary of National Grid plc, a public limited company incorporated under the laws of England and Wales.

The Company has evaluated subsequent events and transactions through April 16, 2016, and concluded that there were no events or transactions that require adjustment to, or disclosure in the notes to, the financial statements.

B. Basis of Presentation

The financial statements are prepared in accordance with accounting requirements of the Federal Energy Regulatory Commission ("FERC") as set forth in its applicable Uniform System of Accounts. This is a comprehensive basis for accounting other than accounting principles generally accepted in the United States ("GAAP"). The significant differences consist of the following:

- for FERC reporting, deferred tax assets and liabilities are presented on a gross basis and are classified as non-current. For GAAP reporting, deferred tax assets and liabilities are presented on a net basis, with current and non-current amounts segregated.
- for FERC reporting, regulatory assets and liabilities are classified as non-current. For GAAP reporting, regulatory assets and liabilities are segregated between current and non-current classifications.
- for FERC reporting, the liability for uncertain tax positions related to temporary differences is not recognized pursuant to FERC guidance and deferred taxes are recognized based on the difference between positions taken in filed tax returns and amounts reported in the financial statements. For GAAP reporting, the liability for uncertain tax positions related to temporary differences is recognized and deferred taxes are recognized based on the difference between the positions taken in filed tax returns adjusted for uncertain tax positions related to temporary differences and amounts reported in the financial statements.
- the accumulated reserve for depreciation for estimated removal costs is included in the accumulated provision for depreciation for FERC reporting and as a regulatory liability or asset retirement obligation for GAAP reporting.
- current and long-term debt is classified in the balance sheet as all long-term debt in accordance with regulatory treatment, while GAAP presentation reflects current and long-term debt separately.
- the intercompany accounts are not netted for FERC reporting but are netted together for GAAP reporting.

The preparation of financial statements in conformity with FERC requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

C. Regulatory Accounting

The FERC, the Rhode Island Public Utilities Commission ("RIPUC") and the Rhode Island Division of Public Utilities and Carriers ("Division") provide the final determination of the rates the Company charges its customers. In certain cases, the actions of the FERC and RIPUC to determine the rates the Company charges its customers would result in an accounting treatment different from that used by non-regulated companies. In these cases, the Company would be required to recognize costs (regulatory assets) or to recognize obligations (regulatory liabilities) if it is probable that these amounts will be recovered or refunded through the rate-making process, which would result in a corresponding increase or decrease in future rates.

In the event the Company determines that its net regulatory assets are not probable of recovery, it would no longer apply the principles of the current accounting guidance for rate-regulated enterprises and would be required to record an after-tax, non-cash charge against income for any remaining regulatory assets and liabilities. The impact could be material to the Company's reported financial condition

| | | | |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|---------------------------------------|----------------------------------|
| Name of Respondent | This Report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission | Date of Report (Mo, Da, Yr) / / | Year/Period of Report 2011/Q4 |
| The Narragansett Electric Company | | | |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | |

and results of operations.

D. Revenue Recognition

The Company bills its customers on a monthly cycle basis at approved tariffs based on energy delivered, a minimum customer service charge, and, in some instances, their demand on the electric system. Revenues are determined based on these bills plus an estimate for unbilled energy delivered between the cycle meter read date and the end of the accounting period. These amounts are billed to customers in the next billing cycle following the December month end.

As approved by the RIPUC, the Company is allowed to pass through for recovery commodity-related costs. Furthermore, the Company's revenue decoupling mechanism allows for annual adjustments to the Company's distribution rates as a result of the reconciliation between allowed revenue and billed revenue. Any difference between the allowed revenue and the billed revenue is recorded as a regulatory asset or liability. The Company defers for future recovery from or refund to electric and gas customers the difference between revenue and expenses from energy conservation programs, standard offer service, transmission service, and contract termination charges.

The gas distribution business is influenced by seasonal weather conditions and therefore the Company's gas utility tariff contains a weather normalization adjustment that provides for recovery from, or refund to, firm customers of material shortfalls or excesses of firm delivery revenues.

Annual revenues are principally realized during the heating season (November through April) as a result of the large proportion of heating sales in these months. Accordingly, results of operations are most favorable in the first calendar quarter of the year, followed by the fourth calendar quarter. Operating losses are generally incurred in the second and third calendar quarters.

The Company's revenue from the sale and delivery of electricity and gas are derived as follows:

| | Electric | | Gas | |
|-------------|---------------------|-------------|---------------------|-------------|
| | December 31, | | December 31, | |
| | 2011 | 2010 | 2011 | 2010 |
| Residential | 54% | 56% | 70% | 70% |
| Commercial | 39% | 38% | 26% | 26% |
| Industrial | 7% | 6% | 4% | 4% |

E. Utility Plant

Utility plant is stated at original cost. The cost of additions to utility plant and replacements of retired units of property are capitalized. Costs include direct material, labor, overhead, and allowance for funds used during construction ("AFUDC"). The cost of renewals and betterments that extend the useful life of utility plant are also capitalized. The cost of repairs, replacements, and major maintenance projects, which do not extend the useful life or increase the expected output of the asset, are expensed as incurred. Whenever utility plant is retired, its original cost, together with the cost of removal, less salvage, is charged to accumulated depreciation. Depreciation is generally computed over the estimated useful life of the asset using the composite straight-line method. Depreciation studies are conducted periodically to update the composite rates and are approved by the state regulatory bodies.

The composite rates and weighted average life for the years ended December 31, 2011 and December 31, 2010 are as follows:

| | | | |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|---------------------------------------|----------------------------------|
| Name of Respondent | This Report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission | Date of Report (Mo, Da, Yr) / / | Year/Period of Report 2011/Q4 |
| The Narragansett Electric Company | | | |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | |

| | Electric | | Gas | |
|-----------------------|--------------|------|--------------|------|
| | December 31, | | December 31, | |
| | 2011 | 2010 | 2011 | 2010 |
| Composite rates | 2.4% | 2.5% | 2.1% | 2.1% |
| Weighted average life | 42 | 41 | 47 | 48 |

In accordance with applicable regulatory accounting guidance, the Company records AFUDC, which represents the estimated debt and equity costs of capital funds necessary to finance the construction of new regulated facilities. Both the debt and equity components of AFUDC are non-cash amounts within the statements of income. AFUDC is capitalized as a component of the cost of utility plant, with an offsetting credit to other income for the equity component and other interest for the debt component in the accompanying statements of income. After construction is completed, the Company is permitted to recover these costs through inclusion in the rate base and the corresponding depreciation expense. The debt component of AFUDC capitalized during the years ended December 31, 2011 and December 31, 2010 was \$0.3 million and \$0.5 million, respectively, and the equity component of AFUDC capitalized during the years ended December 31, 2011 and December 31, 2010 was \$2.1 million and \$0.8 million, respectively.

Goodwill

Goodwill, which is included under the utility plant in the accompanying balance sheets, represents the excess of the purchase price of a business combination over the fair value of tangible and intangible assets acquired, net of the fair value of liabilities assumed and the fair value of any non-controlling interest in the acquisition. The Company tests goodwill for impairment on an annual basis and, on an interim basis, when certain events or circumstances exist.

The goodwill impairment analysis is comprised of two steps. In the first step, the Company compares the fair value of each reporting unit to its carrying value. If the fair value of the reporting unit exceeds the carrying value of the net assets assigned to that unit, goodwill is not considered impaired and no further analysis is required to be performed. If the carrying value of the net assets assigned to the reporting unit exceeds the fair value, then a second step is performed to determine the implied fair value of the reporting unit's goodwill. If the carrying value of a reporting unit's goodwill exceeds its implied fair value, then an impairment charge equal to the difference is recorded.

For the purpose of first step analysis, determination of reporting unit's fair value is typically based on combination of an income-based approach using projected discounted cash flows and a market-based approach using valuation multiples of comparable companies to determine fair value. The resulting fair value of the annual analyses determined that no adjustment of the goodwill carrying value was required for our continuing operations at December 31, 2011 and December 31, 2010.

F. Cash and Cash Equivalents

The Company classifies short-term investments that are highly liquid and have maturities of three months or less at the date of purchase as cash equivalents. These short-term investments are carried at cost which approximates fair value.

G. Special Deposits

Special deposits represent restricted cash, which consists primarily of collateral paid to our counterparties for the outstanding derivative contracts. Deposits are also recorded for property, health insurance, and worker's compensation. At December 31, 2011 and December 31, 2010, \$20 million was required by the Independent System Operator for New England ("ISO-NE") to be on deposit.

H. Income and Other Taxes

Income taxes have been computed utilizing the asset and liability approach that requires the recognition of deferred tax assets and liabilities for the tax consequences of temporary differences by applying enacted statutory tax rates applicable to future years to differences between the financial statement carrying amounts and the tax basis of existing assets and liabilities.

| | | | |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|---------------------------------------|----------------------------------|
| Name of Respondent | This Report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission | Date of Report (Mo, Da, Yr) / / | Year/Period of Report 2011/Q4 |
| The Narragansett Electric Company | | | |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | |

Deferred income taxes reflect the tax effect of net operating losses, capital losses and general business credit carryforwards, and the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial statement and income tax purposes, as determined under enacted tax laws and rates. The financial effect of changes in tax laws or rates is accounted for in the period of enactment. Deferred investment tax credits are amortized over the useful life of the underlying property.

Other taxes primarily include excise tax, property tax, and payroll tax. The Company reports its collections and payments of excise taxes on a gross basis. Gas distribution and electric revenues include the collection of excise taxes, while operating taxes include the related expense. Excise taxes collected and paid for the years ended December 31, 2011 and December 31, 2010 were \$42 million and \$45.4 million, respectively.

I. Comprehensive Income (Loss)

Comprehensive income (loss) is the change in the equity of a company, not including those changes that result from shareholder transactions. While the primary component of comprehensive income (loss) is reported net income or loss, the other component includes unrealized gains and losses associated with certain investments held as available for sale, deferred gains and losses on derivative contracts associated with hedging activities, and deferred pension and post-retirement plans benefit.

J. Derivatives

We employ derivative instruments to hedge a portion of our exposure to commodity price risk. Whenever hedge positions are in effect, we are exposed to credit risks in the event of non-performance by counterparties to derivative contracts, as well as non-performance by the counterparties of the transactions against which they are hedged. We believe the credit risk related to derivative instruments is no greater than that associated with the primary commodity contracts that they hedge.

Commodity Derivative Instruments – Regulated Accounting

We use derivative instruments to reduce cash flow variability associated with the purchase price for a portion of future natural gas purchases associated with our gas operations. Our strategy is to minimize fluctuations in firm gas sales prices to our regulated customers. The accounting for these derivative instruments is subject to the current accounting guidance for rate-regulated enterprises. Therefore, the fair value of these derivatives is recorded as current or deferred assets and liabilities, with offsetting positions recorded as regulatory assets and regulatory liabilities in the accompanying balance sheets. Gains or losses on the settlement of these contracts are initially deferred and then refunded to or collected from our firm gas sales customers consistent with regulatory requirements.

Certain of our contracts for the physical purchase of natural gas and certain power supply contracts were assessed as no longer being exempt as normal purchases. As such, these contracts are recorded in the accompanying balance sheets at fair market value. However, since such contracts were executed for regulated utility customers, and pursuant to the requirements for rate-regulated enterprises, changes in the fair market value of these contracts are recorded as a regulatory asset or regulatory liability in the accompanying balance sheets.

K. Employee Benefits

The Company follows the provisions of the Financial Accounting Standards Board ("FASB") accounting guidance related to the accounting for defined benefit pension and postretirement plans which requires employers to fully recognize all postretirement plans' funded status on the balance sheet as a net liability or asset and requires an offsetting adjustment to accumulated other comprehensive income in shareholder's equity upon implementation or, in the case of regulated enterprises, to regulatory assets or liabilities. Consistent with past practice, and as required by the guidance, the Company values its pension and postretirement benefits other than pensions ("PBOP") assets using the year-end market value of those assets. Benefit obligations are also measured at year-end.

L. Fair Value Measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following is the fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three levels as follows:

| | | | |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|---------------------------------------|----------------------------------|
| Name of Respondent | This Report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission | Date of Report (Mo, Da, Yr) / / | Year/Period of Report 2011/Q4 |
| The Narragansett Electric Company | | | |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | |

Level 1 — quoted prices (unadjusted) in active markets for identical assets or liabilities that a company has the ability to access as of the reporting date;

Level 2 — inputs other than quoted prices included within Level 1 that are directly observable for the asset or liability or indirectly observable through corroboration with observable market data; and

Level 3 — unobservable inputs, such as internally-developed forward curves and pricing models for the asset or liability due to little or no market activity for the asset or liability with low correlation to observable market inputs.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used maximize the use of observable inputs and minimize the use of unobservable inputs.

M. Gas in Storage and Materials

Gas in storage and materials are stated at the lower of cost or market value with cost determined on an average weighted cost basis and is expensed when delivered to customers as gas purchased for resale. Materials and supplies are expensed as used or capitalized into specific capital additions as utilized. The Company's policy is to write off obsolete inventory.

Existing rate orders allow the Company to pass through the cost of gas purchased for resale directly to the rate payers along with any applicable authorized delivery surcharge adjustments. Accordingly, the value of gas in storage does not fall below the cost to the Company. Gas costs passed through to the rate payers are subject to periodic regulatory approval and are reported periodically to the RIPUC.

N. Recent Accounting Pronouncements

Fair Value Measurements

In April 2011, the FASB issued accounting guidance that substantially amended existing guidance with respect to the fair value measurement topic ("the Topic"). The guidance seeks to amend the Topic in order to achieve common fair value measurement and disclosure requirements in GAAP and International Financial Reporting Standards. Consequently, the guidance changes the wording used to describe many of the requirements in GAAP for measuring fair value and for disclosing information about fair value measurements as well as changing specific applications of the Topic. Some of the amendments clarify the FASB's intent about the application of existing fair value measurement requirements. Other amendments change a particular principle or requirement for measuring fair value or for disclosing information about fair value measurements including, but not limited to, fair value measurement of a portfolio of financial instruments, fair value measurement of premiums and discounts, and additional disclosures about fair value measurements. This guidance is effective for financial statements issued for annual periods beginning after December 15, 2011. The early adoption of this guidance for non-public companies is permitted but only for interim periods beginning after December 15, 2011. The Company is currently determining the potential impact of the guidance on its financial position, results of operations, and cash flows.

Goodwill Impairment

In September 2011, the FASB issued accounting guidance related to goodwill impairment testing whereby, an entity has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality of events or circumstances, an entity determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test is unnecessary. Otherwise, the entity is required to perform the two-step impairment test. This guidance is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted. The Company does not expect adoption of this guidance to have an impact on the Company's financial position, results of operations, or cash flows.

| | | | |

| The Narragansett Electric Company | | | 2011/Q4 |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | |

Offsetting Assets and Liabilities

In December 2011, the FASB issued accounting guidance requiring enhanced disclosure related to offsetting assets and liabilities. Under the amendments in this Update, entities will be required to disclose both gross information and net information about both instruments and transactions eligible for offset in the statement of financial position and instruments and transactions subject to an agreement similar to a master netting agreement. This scope would include items such as derivatives. This guidance is effective for fiscal years, and interim periods within that year, beginning after January 1, 2013, and is to be applied retrospectively. As this guidance relates to disclosure only, the adoption of this guidance will not have an impact on the Company's financial position, results of operations, or cash flows.

O. Reclassifications

Certain prior period data in the cash flow statement has been reclassified between operating, investing and financing activities to conform with the current presentation. These reclassifications had no effect on the results of operations and the statement of financial condition.

| Name of Respondent | This Report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission | Date of Report (Mo, Da, Yr) / / | Year/Period of Report |

Note 2. Rates and Regulatory

The following table presents the Company's regulatory assets and regulatory liabilities at December 31, 2011 and December 31 2010:

| | December 31, | |
|------------------------------------------------|---------------------------|-------------------|
| | 2011 | 2010 |
| | (in thousands of dollars) | |
| <i>Other regulatory assets:</i> | | |
| Regulatory deferred tax asset - FAS 109 | \$ 13,396 | \$ 14,893 |
| Environmental response fund | 129,800 | 118,337 |
| 2003 voluntary early retirement offer deferral | 5,022 | 7,533 |
| Postretirement benefits | 70,343 | 91,906 |
| Gas future - gas supply | 61,238 | 49,919 |
| Narragansett Gas & KeySpan cost to achieve | 6,548 | 8,170 |
| Other | 8,169 | 7,355 |
| Total other regulatory assets | <u>\$ 294,516</u> | <u>\$ 298,113</u> |
| <i>Other regulatory liabilities:</i> | | |
| Regulatory deferred tax liabilities - FAS 109 | \$ 1,845 | \$ 2,124 |
| Revaluation - Pension and PBOP | 26,854 | 28,723 |
| Environmental response costs | 8,615 | 9,965 |
| Storm cost reserves | (10,413) | 21,933 |
| Deferred gas cost | 12,775 | - |
| Gas futures - gas supply | 277 | 1,810 |
| Other | 2,201 | (3,608) |
| Total other regulatory liabilities | <u>\$ 42,154</u> | <u>\$ 60,947</u> |

The regulatory items above are not included in the utility rate base at the time the expense is incurred or the revenue is billed. The Company records carrying charges, as appropriate, on the regulatory items for which cash expenditures have been made and are subject to recovery or for which cash has been collected and is subject to refund. Carrying charges are not recorded on items for which expenditures have not yet been made. The Company anticipates recovering these costs in the rates concurrently with future cash expenditures. If recovery is not concurrent with the cash expenditures, the Company will record the appropriate level of carrying charges.

Rate Matters

In June 2009, the Company filed an application to increase electric base distribution rates. In February 2010, the RIPUC approved an increase in base distribution revenue of approximately \$23.5 million based upon a 9.8% rate of return on equity ("ROE") and a 42.75% equity ratio. The Company's new rates went into effect on March 1, 2010 retroactive to January 1, 2010. The RIPUC approved recovery of the increase in revenue generated by the new rates for January and February 2010 over a 13 month period. On April 21, 2010 the Company filed a petition for writ of certiorari with the Rhode Island Supreme Court appealing certain elements of the RIPUC's decision. On January 23, 2012, the Rhode Island Supreme Court vacated and remanded the RIPUC's determination of the Company's rate-making capital structure for further hearings. On March 2, 2012, the Company and the Division filed a settlement agreement with the RIPUC recommending a capital structure that would result in an increase in the Company's annual revenue requirement of approximately \$3.2 million, effective April 23, 2012. RIPUC is expected to rule on this settlement agreement in April 2012.

During May 2010, Rhode Island enacted decoupling legislation that provides for the annual reconciliation of the revenue requirement allowed in the Company's base distribution rate case to actual revenue billed by the electric and gas business. The Company filed a proposal to implement revenue decoupling for both electric and gas in October 2010. At an open meeting held on July 26, 2011, the

| | | | |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|---------------------------------------|----------------------------------|
| Name of Respondent | This Report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission | Date of Report (Mo, Da, Yr) / / | Year/Period of Report 2011/Q4 |
| The Narragansett Electric Company | | | |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | |

RIPUC approved both the electric and gas decoupling mechanisms, effective retroactively to April 1, 2011. The new law also provides for submission and approval of an annual infrastructure spending plan without having to file a full general rate case. In December 2011, the Company filed its fiscal year 2013 gas and electric annual infrastructure spending plans requesting a revenue requirement increase of approximately \$4.5 million for the electric business and \$7.2 million for the gas business. On March 2, 2012, the RIPUC approved the fiscal year 2013 gas plan for effect April 1, 2012. The RIPUC has scheduled a March 23, 2012, hearing regarding the fiscal year 2013 electric plan and approved the proposal on March 29, 2012 for rates effective April 1, 2012.

The Company's affiliate, New England Power ("NEP") operates the transmission facilities of its New England affiliates as a single integrated system and reimburses the Company for the cost of its transmission facilities in Rhode Island, including a return on those facilities, under NEP's Tariff No. 1. In turn, these costs are allocated among transmission customers in New England in accordance with the ISO New England transmission tariff. Effective June 1, 2007, the FERC approved amendments to Tariff No. 1 whereby the Company is compensated for its actual monthly transmission costs with its authorized ROE ranging from 11.14% to 12.64%. In December 2009, NEP filed with the FERC a proposed amendment to the Tariff No. 1 formula rate revenue requirements which decreased the Company's compensation for its electric transmission facilities by approximately \$0.1 million. In March 2010, the FERC issued an order establishing hearing and settlement procedures for this filing and made the new rates effective January 1, 2010. In March 2011, NEP filed an uncontested settlement agreement with the FERC resolving all issues raised by the Massachusetts Attorney General in this proceeding. On July 8, 2011, the FERC accepted the settlement without modification.

In September 2008, the Company, NEP, and Northeast Utilities jointly filed an application with the FERC to recover financial incentives for the New England East-West Solution ("NEEWS"), pursuant to the FERC's Transmission Pricing Policy Order, Order No. 679. NEEWS, consists of a series of inter-related transmission upgrades identified in the New England Regional System Plan and is being undertaken to address a number of reliability problems in the tri-state area of Connecticut, Massachusetts, and Rhode Island. The Company's share of the NEEWS-related transmission investment is approximately \$575 million and NEP's share is approximately \$200 million. The Company is fully reimbursed for its transmission revenue requirements on a monthly basis by NEP through NEP's Tariff No. 1. Effective as of November 18, 2008, the FERC granted for NEEWS (1) an incentive ROE of 12.89% (125 basis points above the approved base ROE of 11.64%), (2) 100% construction work in progress ("CWIP") in rate base and (3) recovery of plant abandoned for reasons beyond the companies' control. Parties opposing the NEEWS incentives sought rehearing of the FERC order. On June 28, 2011, the FERC denied all requests for rehearing.

As a condition of the FERC's approval, the FERC directed the Company to provide footnote disclosures in the notes to its financial statements which (1) fully explain the impact of CWIP in rate base; (2) include details of allowance for fund used during construction ("AFUDC") not capitalized because of CWIP in rate base for the current year, the previous two years, and the sum of all years; and (3) include a partial balance sheets consisting of the assets and other debits section of the balance sheets to include the amounts of AFUDC not capitalized because of the inclusion of CWIP in rate base. At December 31, 2011, the Company had total net electric utility plant assets on its balance sheets of \$1.2 billion including \$228.3 million of CWIP. At December 31, 2011 and December 31, 2010, the Companies NEEWS-related CWIP and in-service investment totaled \$263.1 million and \$101.4 million respectively.

| <i>(in millions)</i> | Current Year to Date (January 11 - December 11) | Previous Two Years (January 09 - December 10) | Sum of All Years November 08 - December 11 |
|------------------------------------|----------------------------------------------------|--------------------------------------------------|-----------------------------------------------|
| Average Monthly NEEWS CWIP Balance | \$136.704 | \$23.112 | \$58.186 |
| Estimated Annual AFUDC Rate | 7.08% | 3.78% | 6.22% |
| Avoided AFUDC | \$9.679 | \$1.747 | \$11.465 |
| Return | \$15.519 | \$6.180 | \$21.809 |

On September 30, 2011, several state and municipal parties in New England, including the Massachusetts Attorney General's Office, the Connecticut Public Utilities Regulatory Authority and the Massachusetts Department of Public Utilities, filed with the FERC a complaint under Section 206 of the Federal Power Act against certain Transmission Owners to lower the base ROE for transmission rates in New England from the FERC approved rate of 11.14% to 9.2 %. At this time, the Company cannot predict the outcome of the complaint.

| | | | |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|---------------------------------------|----------------------------------|
| Name of Respondent | This Report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission | Date of Report (Mo, Da, Yr) / / | Year/Period of Report 2011/Q4 |
| The Narragansett Electric Company | | | |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | |

In August 2011, the Company made its annual Distribution Adjustment Charge ("DAC") filing for its gas business. The DAC was established to provide for the recovery and reconciliation of the costs of identifiable special programs, as well as to facilitate the timely revenue recognition of incentive provisions. The prior DAC rate recovered approximately \$3.2 million from customers. The proposed DAC rate would result in recovery of approximately \$2.2 million from customers for the period November 2011 through October 2012. On October 26, 2011, the Commission approved the proposed DAC rate for effect November 1, 2011.

The Company is allowed recovery of all of its electric and gas commodity costs through a fully reconciling rate recovery mechanism. In addition, the Company is allowed to recover from its electric customers all of its electric transmission costs and costs charged by the Company's affiliate NEP, for stranded costs associated with NEP's former electric generation investments.

Energy Efficiency

In 2009, Rhode Island passed a law promoting the development of renewable energy resources through long-term contracts for the purchase of capacity, energy, and attributes. In March 2010, the Company filed its proposed timetable and method of execution of annual long-term contract solicitations, which was approved by RIPUC in June 2010, with some modifications. The law also required the Company to negotiate a contract for an electric generating project fueled by landfill gas from the Rhode Island Central Landfill. The project, referred to as the Town of Johnston Project, is a combined cycle power plant with an average output of 32 megawatts ("MW") for which the Company entered into a contract with Rhode Island LFG Genco, LLC in June 2010. The Division issued a certification on July 1, 2010, and filed the contract with the RIPUC in July 2010.

The 2009 legislation also required the Company to solicit proposals for a small scale renewable energy generation project of up to eight wind turbines with an aggregate nameplate capacity of up to 30 MW to benefit the Town of New Shoreham that also includes a transmission cable to be constructed between Block Island and the mainland of Rhode Island. In October 2009, the Company entered into a 20 year Power Purchase Agreement ("PPA") with Deepwater Wind Block Island LLC ("Deepwater") and in December 2009, the Company filed the PPA with the RIPUC. In March 2010, the RIPUC voted to reject the PPA due to pricing issues. As a result, the legislature amended the law to specifically authorize the Company to enter into an amended PPA with Deepwater, to establish a new standard of review, and to provide for a reduction in the initial fixed price under the prior PPA if certain cost savings could be achieved. In August 2010, the RIPUC approved the amended PPA. Certain parties appealed the RIPUC's decision and on July 1, 2011, the Rhode Island Supreme Court issued its decision upholding the RIPUC's approval of the PPA with Deepwater. On September 29, 2011, the Company filed with the RIPUC for approval of a waiver of the one-year termination provision regarding appeals resolution contained in the PPA. On November 29, 2011, the RIPUC voted to approve that waiver.

On July 28, 2011, the RIPUC unanimously approved a 15 year PPA with Orbit Energy Rhode Island, LLC for a 3.2 MW anaerobic digester biogas project. This is the first PPA that the Company submitted to the RIPUC for review as a result of the Company's annual solicitation process that was approved by the RIPUC on March 1, 2010. Following the Company's second annual solicitation, the Company executed a 15 year PPA with Black Bear Development Holdings, LLC on February 17, 2012, for a 3.9 MW run-of-river hydroelectric plant located in Orono, Maine, which will be submitted to the RIPUC for review and approval.

In June 2011, Rhode Island established a 10% carve out to the 90 MW of long-term contracting requirement for renewable energy to be used for long-term contracts for smaller Distributed Generation ("DG") projects over a four year period from 2011 through 2014. In December 2011, the Company conducted the first enrollment under these new provisions and entered into standard contracts for 5 MW of nameplate capacity.

The Rhode Island long-term contracting and DG contracting legislation permits the Company to recover all costs incurred under such contracts and permits the Company to recover remuneration equal to 2.75% of the actual annual payments made under the long-term contracts for those projects that are commercially operating.

On September 7, 2011, the Company filed its second three-year Energy Efficiency ("EE") plan under the least cost procurement legislation, as amended, with the RIPUC for 2012-2014 program years. The three-year plan provides the framework for the detailed annual EE plans and System Reliability Plans. On December 22, 2011, the RIPUC approved the three-year plan.

On December 21, 2011, the RIPUC approved the annual EE plan for the calendar year 2012, which includes a portfolio of electric and gas energy efficiency programs along with the associated budgets and electric and gas EE program charges for effect January 1, 2012.

|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|---------------------------------------|----------------------------------|
| Name of Respondent | This Report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission | Date of Report (Mo, Da, Yr) / / | Year/Period of Report 2011/Q4 |
| The Narragansett Electric Company | | | |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | |

The calendar year 2012 electric and gas EE programs contain spending budgets of approximately \$61.4 million and \$13.7 million, respectively, which are to be collected through the approved EE program charges.

Other Regulatory Matters

In June 2009, the Company filed an initial application seeking authorization to issue and sell one or more series of new long-term debt. In December 2009, the Division approved a settlement with NGUSA authorizing an issuance of \$550 million in new long-term debt by March 2010. The Company issued this debt on March 22, 2010, in two tranches. In March 2011, the Company notified the Division of its intent to seek permission for an additional issuance in an amount of \$290 million.

In November 2008, FERC commenced an audit of NGUSA, including its service companies and other affiliates in the National Grid holding company system. The audit evaluated our compliance with: 1) cross-subsidization restrictions on affiliate transactions; 2) accounting, recordkeeping and reporting requirements; 3) preservation of records requirements for holding companies and service companies; and 4) Uniform System of Accounts for centralized service companies. The final audit report from the FERC was received in February 2011. In April 2011, NGUSA replied to the FERC and outlined its plan to address the findings in the report, which we are currently in the process of implementing. None of the findings had a material impact on the financial statements of the Company.

Note 3. Employee Benefits

The Company participates with certain other NGUSA subsidiaries in non-contributory defined benefit plans ("Pension Plans") and the PBOPs (together with the Pension Plans the "Plans"). The Pension Plans are comprised of both qualified and non-qualified plans. The qualified pension plans provide substantially all employees hired before January 1, 2011 with a retirement benefit. The non-qualified pension plans provide additional defined pension benefits to certain eligible executives. PBOPs provide health care and life insurance coverage to eligible retired employees. Eligibility is based on age and length of service requirements and in most cases, retirees must contribute to the cost of their coverage.

The Plan assets are commingled and cannot be allocated to an individual company. The Plans' costs are allocated to the Company. The Company is subject to certain deferral accounting requirements mandated by the RIPUC for pension and PBOP expense. Any variation between actual costs and amounts used to establish rates are deferred as a regulatory asset or a regulatory liability and collected from or refunded to customers in subsequent periods. Any deferral is recorded as either a regulatory asset or regulatory liability in the accompanying balance sheets.

At December 31, 2011 and December 31, 2010, the pension plans of NGUSA have a net underfunded obligation of \$339.1 million and \$377.7 million, respectively. The PBOP plans of NGUSA have a net underfunded obligation of \$340.8 million and \$429.1 million as of December 31, 2011 and December 31, 2010, respectively.

| | | | |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|---------------------------------------|----------------------------------|
| Name of Respondent | This Report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission | Date of Report (Mo, Da, Yr) / / | Year/Period of Report 2011/Q4 |
| The Narragansett Electric Company | | | |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | |

The pension and PBOP expenses directly charged and allocated from the service company, net of capital, for the years ended December 31, 2011 and December 31, 2010 are as follows:

| | | December 31, | |
|---------|----|----------------------------------|-----------|
| | | 2011 | 2010 |
| | | <i>(in thousands of dollars)</i> | |
| Pension | \$ | 16,467 | \$ 14,796 |
| PBOP | | 14,294 | 14,830 |
| | \$ | 30,761 | \$ 29,626 |

Defined Contribution Plan

The Company has a defined contribution pension plan (employee savings fund plan) that covers substantially all employees. Employer matching contributions of approximately \$2.3 million and \$2.4 million was expensed for the years ended December 31, 2011 and December 31, 2010, respectively.

Note 4. Utility Plant

At December 31, 2011 and December 31, 2010, utility plant, at cost, and accumulated depreciation and amortization are as follows:

| | | December 31, | |
|-------------------------------------------|----|----------------------------------|--------------|
| | | 2011 | 2010 |
| | | <i>(in thousands of dollars)</i> | |
| Plant and machinery | \$ | 2,169,677 | \$ 2,069,756 |
| Goodwill | | 751,164 | 751,164 |
| Land and buildings | | 84,471 | 95,596 |
| Assets in construction | | 294,928 | 111,111 |
| Software and othe intangibles | | 28,692 | 28,534 |
| Total | | 3,328,932 | 3,056,161 |
| Accumulated depreciation and amortization | | (975,350) | (942,187) |
| Utility plant, net | \$ | 2,353,582 | \$ 2,113,974 |

Note 5. Income Taxes

| | | | |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|---------------------------------------|----------------------------------|
| Name of Respondent | This Report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission | Date of Report (Mo, Da, Yr) / / | Year/Period of Report 2011/Q4 |
| The Narragansett Electric Company | | | |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | |

The components of federal income tax expenses (benefits) are as of follows:

| | Years Ended December 31, | |
|------------------------------------------------------|----------------------------------|------------------|
| | 2011 | 2010 |
| | <i>(in thousands of dollars)</i> | |
| Current federal tax (benefit) expense: | \$ (34,158) | \$ 4,335 |
| Deferred federal tax expense: | 52,956 | 17,080 |
| Amortized investment tax credits, net ⁽¹⁾ | (493) | (527) |
| Total income tax expense | <u>\$ 18,305</u> | <u>\$ 20,888</u> |

(1) Investment tax credits ("ITC") are being deferred and amortized over the depreciable life of the property giving rise to the credits.

Total income taxes in the statements of operations:

| | | |
|----------------------------------------------------|------------------|------------------|
| Income taxes charged to operations | \$ 17,715 | \$ 20,062 |
| Income taxes credited to other income (deductions) | 590 | 826 |
| Total | <u>\$ 18,305</u> | <u>\$ 20,888</u> |

Reconciliation between the expected federal income tax expense, using the federal statutory rate of 35%, to the Company's actual income tax expense for the years ended December 31, 2011 and December 31, 2010 is as follows:

| | Years Ended December 31, | |
|----------------------------------------------------------------------------------------|----------------------------------|------------------|
| | 2011 | 2010 |
| | <i>(in thousands of dollars)</i> | |
| Computed tax | \$ 20,180 | \$ 16,397 |
| Change in computed taxes resulting from: | | |
| Audit and related reserve movements | (1,397) | (699) |
| Rate recovery of deficiency in deferred tax reserves | 1,300 | - |
| Allowance for equity funds used during construction | (720) | (283) |
| Investment tax credit | (493) | (527) |
| Intercompany tax allocation | - | (2,000) |
| Medicare subsidy, including the Patient Protection and Affordable Care Act effect, net | - | 7,350 |
| Other items - net | (565) | 650 |
| Total | <u>(1,875)</u> | <u>4,491</u> |
| Federal income taxes | <u>\$ 18,305</u> | <u>\$ 20,888</u> |

Significant components of the Company's net deferred tax assets and liabilities at December 31, 2011 and December 31, 2010 are as

| | | | |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|---------------------------------------|-----------------------|
| Name of Respondent | This Report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission | Date of Report (Mo, Da, Yr) / / | Year/Period of Report |
| The Narragansett Electric Company | | | 2011/Q4 |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | |

follows:

| | December 31, | |
|--------------------------------------------|----------------------------------|------------|
| | 2011 | 2010 |
| | <i>(in thousands of dollars)</i> | |
| Deferred tax assets: | | |
| Pensions, PBOP and other employee benefits | \$ 43,714 | \$ 70,797 |
| Reserve - environmental | 43,347 | 41,437 |
| Net operating losses | 23,990 | 24,002 |
| Other items | 13,982 | 8,026 |
| Total deferred tax assets ⁽¹⁾ | 125,033 | 144,262 |
| Deferred tax liabilities: | | |
| Property related differences | 294,989 | 303,120 |

| Net deferred income tax liabilities | \$ 274,701 | \$ 209,535 |
| Deferred investment tax credit | \$ 1,377 | \$ 1,870 |

⁽¹⁾There were no valuation allowances for deferred tax assets at December 31, 2011 or December 31, 2010.

The Company is a member of the National Grid Holdings Inc. ("NGHI") and subsidiaries consolidated federal income tax return. The Company has joint and several liabilities for any potential assessments against the consolidated group.

The Company adopted the provisions of FASB guidance which clarifies the accounting for uncertain tax positions as modified by FERC Docket AI07-2-000. FASB guidance provides that the financial effects of a tax position shall initially be recognized when it is more likely than not, based on the technical merits, that the position will be sustained upon examination, assuming the position will be audited and the taxing authority has full knowledge of all relevant information. FERC docket AI07-2-000 issues supplementary guidance requiring entities to continue to recognize deferred income taxes for Commission accounting and reporting purposes based on the difference between positions taken in tax returns filed or expected to be filed and amounts reported in the financial statements.

The following table reconciles the changes to the Company's unrecognized tax benefits for the years ended December 31, 2011 and December 31, 2010:

| | | | |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|---------------------------------------|-----------------------|
| Name of Respondent | This Report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission | Date of Report (Mo, Da, Yr) / / | Year/Period of Report |
| The Narragansett Electric Company | | | 2011/Q4 |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | |

| | Years Ended December 31, | |
|---------------------------------------------------------------|---------------------------|---------------|
| | 2011 | 2010 |
| | (in thousands of dollars) | |
| Beginning balance | \$ 19,013 | \$ - |
| Additions based on tax positions related to the prior years | 9,449 | 15,099 |
| Additions based on tax positions related to the current years | 7,810 | 3,914 |
| | <u>36,272</u> | <u>19,013</u> |
| Less: unrecognized tax benefits on temporary differences | <u>(36,272)</u> | <u>19,013</u> |
| Balance at the end of the year | <u>\$ -</u> | <u>\$ -</u> |

As of December 31, 2011 and December 31, 2010, the Company has accrued for interest related to unrecognized tax benefits of \$0.6 million and \$0.3 million, respectively. During the year ended December 31, 2011, the Company recorded interest expense of \$0.4 million. During the year ended December 31, 2010, the Company recorded interest benefit of \$0.4 million. The Company recognizes accrued interest related to unrecognized tax benefits in interest expense or interest income and related penalties, if applicable, in non-operating expenses. No penalties were recognized during the years ended December 31, 2011 and December 31, 2010.

Federal income tax returns have been examined and all issues have been agreed with the Internal Revenue Service ("IRS") and the NGHI consolidated filing group through March 31, 2004. During the year ended December 31, 2010, the NGHI consolidated group reached an agreement with the IRS that contained a settlement of the majority of the income tax issues related to the years ended March 31, 2005 through March 31, 2007 as well as an acknowledgment that certain discrete items remained disputed.

The Company is in the process of appealing certain disputed issues with the IRS Office of Appeals relating to its tax returns for March 31, 2005 through March 31, 2007. The Company does not anticipate a change in its unrecognized tax positions in the next twelve months as a result of filing the appeals. During the calendar year, the IRS began a new audit examination cycle the covering the fiscal years ended March 31, 2008 and March 31, 2009. The fiscal years ended March 31, 2010 and March 31, 2011 remain subject to examination by the IRS.

Note 6. Derivative Contracts

Physical Derivatives

Current accounting guidance for derivative instruments establishes criteria that must be satisfied in order for option contracts, forward contracts with optionality features, or contracts that combine a forward contract and a purchased option contract to qualify as normal purchase and normal sales. Certain contracts for the physical purchase of natural gas do not qualify for this exception. Because these contracts are for the purchase of natural gas sold to regulated firm gas sales customers, the accounting for these contracts follows the accounting guidance for rate-regulated enterprises. The fair value of these derivatives at December 31, 2011 and December 31, 2010 was a net asset of \$0.1 million and \$0.3 million, respectively.

Financial Derivatives

The Company is exposed to certain risks relating to its ongoing business operations, primarily commodity price risk. Financial and physical forward contracts on gas are entered into to manage this price risk and reduce the cash flow variability associated with the Company's forecasted purchases and sales of natural gas associated with the gas operations. Our strategy is to minimize fluctuations in gas sales prices to our regulated customers. The accounting for these derivative instruments follows the accounting guidance for rate-regulated enterprises. Therefore, the fair value of these derivatives is recorded as current or deferred assets and liabilities, with offsetting positions recorded as regulatory assets or regulatory liabilities in the accompanying balance sheets. As these derivative contracts are eligible for rate regulated accounting treatment, changes in fair value have no income statement impact. Gains or losses upon settlement of these contracts are initially deferred and then refunded to or collected from our firm gas sales customers consistent with regulatory requirements.

| Name of Respondent | This Report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission | Date of Report (Mo, Da, Yr) / / | Year/Period of Report |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|---------------------------------------|-----------------------|
| The Narragansett Electric Company | | / / | 2011/Q4 |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | |

Currently the Company utilizes New York Mercantile Exchange ("NYMEX") and over-the-counter gas swaps and NYMEX gas futures. The fair value of the gas derivative instruments at December 31, 2011 and December 31, 2010 was a net liability of \$51.6 million and \$40.7 million, respectively.

Other Derivative Instruments

Additionally, the Company employs a small number of derivative instruments related to storage optimization. These financial derivative instruments do not qualify for hedge accounting treatment. We use market quoted forward prices to value these contracts. The fair value of these contracts at December 31, 2011 was immaterial. The fair value of these contracts at December 31, 2010 was a net liability of \$0.2 million. We use market quoted forward prices to value these contracts.

The following are commodity volumes in dekatherms ("dths") associated with those derivative contracts as of December 31, 2011 and December 31, 2010:

| | | December 31, | |
|-------------|--------------------|----------------|---------------|
| | | 2011 | 2010 |
| | | (in thousands) | |
| Physicals: | Gas (dths) | 3,670 | 3,848 |
| Financials: | Gas swaps (dths) | 12,875 | 20,430 |
| | Gas Futures (dths) | 19,320 | 14,850 |
| | | <u>35,865</u> | <u>39,128</u> |

The following table presents the Company's derivative contract assets and (liabilities) on the balance sheets:

| Asset Derivatives | | | | Liability Derivatives | | | |
|---------------------------|----|------|----------|---------------------------|----|--------|-----------|
| December 31, | | | | December 31, | | | |

| | <u>(260)</u> | <u>42</u> |
| Total net increase in regulatory assets | <u>\$ 10,829</u> | <u>\$ 14,045</u> |

Credit and Collateral

Derivative contracts are primarily used to manage exposure to market risk arising from changes in commodity prices and interest rates. In the event of non-performance by a counterparty to a derivative contract, the desired impact may not be achieved. The risk of counterparty non-performance is generally considered a credit risk and is actively managed by assessing each counterparty credit profile and negotiating appropriate levels of collateral and credit support. In instances where the counterparties' credit quality has declined, or credit exposure exceeds certain levels, we may limit our credit exposure by restricting new transactions with counterparties, requiring additional collateral or credit support and negotiating the early termination of certain agreements. As of December 31, 2011 and December 31, 2010, the Company has paid \$32.4 million and \$32 million, respectively, to its counterparties as collateral associated with outstanding derivative contracts. This amount has been recorded as restricted cash, with offsetting positions on the balance sheet.

The aggregate fair value of the Company's derivative instruments with credit-risk-related contingent features that are in a liability position on December 31, 2011, for which the Company does not post any collateral in the normal course of business, is \$ 6.3 million. If the Company's credit rating were to be downgraded by one notch, it would not be required to post any additional collateral. If the Company's credit rating were to be downgraded by three notches, it would be required to post \$6.8 million additional collateral to its counterparties.

| NOTES TO FINANCIAL STATEMENTS (Continued) | | | |

Note 7. Fair Value Measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following is a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three levels as follows:

The Company's Level 1 fair value derivative instruments primarily consist of natural gas futures and swaps traded on the NYMEX. There is no liquidity or credit reserve associated with such trades, and no discounting as well.

The Company's Level 2 fair value derivative instruments primarily consist of forward physical gas deals where market data for pricing inputs is observable. Level 2 pricing inputs are obtained from NYMEX and Intercontinental Exchange ("ICE"), except cases when ICE publishes seasonal averages or there were no transactions within the last seven days. During periods prior to December 31, 2010 Level 2 pricing inputs were obtained from NYMEX and Platts M2M (industry standard, non-exchange-based editorial commodity forward curves) when it can be verified by available market data from ICE based on transactions within the last seven days. Level 2 derivative instruments may utilize discounting based on quoted interest rate curve as well as have liquidity reserve calculated based on bid/ask spread. Substantially all of these price curves are observable in the marketplace throughout at least 95% of the remaining contractual quantity, or they could be constructed from market observable curves with correlation coefficients of 0.95 or higher.

Level 3 fair value derivative instruments primarily consist of our gas OTC forwards, options, and physical gas transactions where pricing inputs are unobservable, as well as other complex and structured transactions. Complex or structured transactions can introduce the need for internally-developed models based on reasonable assumptions. Industry-standard valuation techniques, such as Black-Scholes pricing model, Monte Carlo simulation, and Financial Engineering Associates libraries are used for valuing such instruments. The value is categorized as Level 3. Level 3 is also applied in cases when forward curve is internally developed, extrapolated or derived from market observable curve with correlation coefficients less than 0.95, or optionality is present, or non-economical assumptions are made.

The internally developed forward curves have a high level of correlation with Platts M2M curves.

Available for sale securities are primarily equity investments based on quoted market prices and municipal and corporate bonds based on quoted prices of similar traded assets in open markets.

The following table presents assets and liabilities measured and recorded at fair value in the accompanying balance sheets on a recurring basis and their level within the fair value hierarchy as of December 31, 2011 and December 31, 2010:

| | December 31, 2011 | | | |
|-------------------------------|----------------------------------|-------------|---------|-------------|
| | Level 1 | Level 2 | Level 3 | Total |
| | <i>(in thousands of dollars)</i> | | | |
| Assets: | | | | |
| Derivative contracts | \$ - | \$ 120 | \$ 277 | \$ 397 |
| Available for sale securities | 1,596 | 2,175 | - | 3,771 |

| NOTES TO FINANCIAL STATEMENTS (Continued) | | | |

| December 31, 2010 | | | | |
|-------------------------------|----------------------------------|-------------|---------|-------------|
| | Level 1 | Level 2 | Level 3 | Total |
| | <i>(in thousands of dollars)</i> | | | |
| Assets: | | | | |
| Derivative contracts | \$ 493 | \$ 889 | \$ 456 | \$ 1,838 |
| Available for sale securities | 1,520 | 1,999 | - | 3,519 |
| Total assets | 2,013 | 2,888 | 456 | 5,357 |
| Liabilities: | | | | |
| Derivative contracts | 13,187 | 28,921 | 356 | 42,464 |
| Net (liabilities) assets | \$ (11,174) | \$ (26,033) | \$ 100 | \$ (37,107) |

The following table presents the fair value reconciliation of Level 3 assets and liabilities measured at fair value on a recurring basis during the year ended December 31, 2011:

| <i>(in thousands of dollars)</i> | 2011 |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Balance, beginning of year | \$ 100 |
| Total gains and losses included in regulatory assets and liabilities | (494) |
| Purchases | 34 |
| Settlements: | |
| included in earnings | 246 |
| included in regulatory assets and liabilities | 201 |
| Balance, end of year | \$ 87 |
| The amount of total gains or losses for the period included in net income attributed to the change in unrealized gains or losses related to derivative assets and liabilities at December 31, 2011 | \$ - |

A transfer into Level 3 represents existing assets or liabilities that were previously categorized at a higher level for which the inputs became unobservable. A transfer out of Level 3 represents assets and liabilities that were previously classified as Level 3 for which the inputs became observable based on the criteria discussed previously for classification in Level 2. These transfers, which are recognized at the end of each period, result from changes in the observability of forward curves from the beginning to the end of each reporting period. There were no transfers between Level 1 and Level 2 during the twelve months ended December 31, 2011 and December 31, 2010.

Long-term Debt

The Company's balance sheets reflect the long-term debt at carrying value. The fair value of this debt at December 31, 2011 and December 31, 2010 is approximately \$697.6 million and \$643.7 million, respectively. The fair value is based on quoted market prices where available or calculated prices based on the remaining cash flows of the underlying bond discounted at the Company's incremental borrowing rate.

Note 8. Debt

Short-term

The Company has regulatory approval from the FERC to issue up to \$400 million of short-term debt. The company has no short-term

| FMB Series N | 9.630% | May 30, 2020 | 10,000 | 10,000 |
| FMB Series O | 8.460% | September 30, 2022 | 12,500 | 12,500 |
| FMB Series P | 8.090% | September 30, 2022 | 6,875 | 7,500 |
| FMB Series R | 7.500% | December 15, 2025 | 10,500 | 11,250 |
| Total long-term debt | | | \$ 604,339 | \$ 605,714 |

Unsecured Notes

The Company issued debt on March 22, 2010, in two tranches. \$250 million of 10-year unsecured bonds were issued at a coupon rate of 4.534% and \$300 million of 30-year unsecured bonds were issued at a coupon rate of 5.638%. The proceeds from the financing were used to: (i) replenish internally generated cash funds that were provided by retained earnings and were used to finance past capital investments in long-lived utility plant assets and refund long-term debt that was issued to finance those investments; (ii) fund future capital expenditures; (iii) term out existing short-term debt so that these financing resources can be made available for ongoing working capital needs, and; (iv) pay dividends. The payment of dividends resulted in a more optimal and cost efficient capital structure for the Company and leaves the Company within an appropriate capital structure for the nature of its business and attendant risk profile.

On March 18, 2010, National Grid plc settled the derivative financial instrument that it had entered into in connection with such bond issuances for the purpose of locking-in the risk-free interest rate element of the bond issues. The \$10.2 million on the "treasury lock" settlement is included as accumulated other comprehensive income in the accompanying balance sheets, and amortized over the life of the bonds to match the corresponding rate treatment.

First Mortgage Bonds

At December 31, 2011, the Company had outstanding of \$54.3 million First Mortgage Bonds. Substantially all of the assets used in the gas business of the Company are subject to the lien of the mortgage indentures under which the first mortgage bonds have been issued. Interest rates ranged from 6.82% to 9.63%. Maturities range from April 2018 to December 2025. The First Mortgage Bonds have annual sinking fund requirements totaling approximately \$1.4 million.

The Company has a maximum 70% of debt-to-capitalization covenant. Furthermore, if at any time the Company's debt exceeds 60% of the total capitalization, each holder of bonds then outstanding shall receive effective as of the first date of such occurrence, a one time permanent 0.20% increase in the interest rate paid by the Company on its bonds. During the years ended December 31, 2011 and December 31, 2010, the Company was in compliance with this covenant. At December 31, 2011 and December 31, 2010 the Company's debt-to-capitalization ratio was 30% and 31%, respectively.

| | | | |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|---------------------------------------|-----------------------|

| The Narragansett Electric Company | | / / | 2011/Q4 |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | |

The aggregate maturities of long-term debt for the five years subsequent to December 31, 2011 are approximately:

(in thousands of dollars)

| <u>Years Ended December 31,</u> | |
|---------------------------------|--------------------------|
| 2012 | \$ 1,375 |
| 2013 | 1,375 |
| 2014 | 1,375 |
| 2015 | 1,375 |
| 2016 | 1,375 |
| Thereafter | <u>597,464</u> |
| Total | <u>\$ 604,339</u> |

Note 9. Commitments and Contingencies

Electricity and Gas Supply, Storage and Pipeline Commitments

The Company's electricity and gas distribution subsidiaries have entered into various contracts for electricity and gas delivery, storage and supply services. Certain of these contracts require payment of annual demand charges in the aggregate amount of approximately \$461 million. The Company and its electricity and gas distribution subsidiaries are liable for these payments regardless of the level of services required from third parties. Such charges are currently recovered from utility customers as gas and electricity costs.

The Company's commitments under these long-term contracts, as of December 31, 2011, are summarized in the table below.

(in thousands of dollars)

| <u>Years ended December 31,</u> | |
|---------------------------------|--------------------------|
| 2012 | \$ 302,120 |
| 2013 | 67,361 |
| 2014 | 16,193 |
| 2015 | 12,096 |
| 2016 | 10,620 |
| Thereafter | <u>52,628</u> |
| Total | <u>\$ 461,018</u> |

The Company's subsidiaries purchases any additional energy needed to meet load requirements and can purchase from other independent power producers, other utilities, energy merchants or on the open market through the New York Independent System Operator or ISO-NE at market prices.

Legal Matters

The Company is subject to various legal proceedings arising out of the ordinary course of its business. The Company does not consider any of such proceedings to be material, individually or in the aggregate, to its business or likely to result in a material adverse effect on its results of operations, financial condition, or cash flows.

Environmental Matters

The normal ongoing operations and historic activities of the Company are subject to various federal, state and local environmental laws and regulations. Under federal and state Superfund laws, potential liability for the historic contamination of property may be imposed on responsible parties jointly and severally, without fault, even if the activities were lawful when they occurred.

| | | | |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|---------------------------------------|----------------------------------|
| Name of Respondent | This Report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission | Date of Report (Mo, Da, Yr) / / | Year/Period of Report 2011/Q4 |
| The Narragansett Electric Company | | | |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | |

The United States Environmental Protection Agency ("EPA"), the Massachusetts Department of Environmental Protection ("DEP"), and the Rhode Island Department of Environmental Management ("DEM") have alleged that the Company is a potentially responsible party under state or federal law for a number of sites at which hazardous waste is alleged to have been disposed. The Company's most significant liabilities relate to former manufactured gas plant ("MGP") facilities formerly owned by the Blackstone Valley Gas and Electric Company and the Rhode Island gas distribution assets of New England Gas. The Company is currently investigating and remediating, as necessary, those MGP sites and certain other properties under agreements with the EPA, DEM and DEP.

The RIPUC approved a settlement agreement that provides for rate recovery of remediation costs of former MGP sites and certain other hazardous waste sites located in Rhode Island. Under that agreement, qualified costs related to these sites are paid out of a special fund established on the Company's books. Rate-recoverable contributions of approximately \$3 million are added annually to the fund along with interest and any recoveries from insurance carriers and other third parties. Under the agreement, costs are amortized over a ten year period and subject to an annual cap linked to gas usage.

The Company believes that obligations imposed on it because of the environmental laws will not have a material impact on its results of operations or financial condition due to rate recovery. At December 31, 2011 and December 31, 2010, the Company's total reserves for estimated environmental activities were approximately \$115.2 million and \$118.8 million, respectively. The Company has also reflected an environmental regulatory asset of \$129.8 million and \$118.3 million at December 31, 2011 and December 31, 2010, respectively. Those reserves may need to be materially increased in the future if new sites are identified or currently unknown contamination is discovered, if other potentially responsible parties fail to pay their share, or if there are changes in laws or policies, or the enforcement thereof, relating to the investigation or remediation of those sites.

Note 10. Related Party Transactions

Intercompany Money Pool

NGUSA and certain affiliates, including the Company, participate in money pools to more effectively utilize cash resources and to reduce outside short-term borrowings. The money pool in which this Company participates is administered by the NGUSA Service Company as the agent for the participants. Short-term borrowing needs are met first by available funds of the moneypool participants. Borrowings from the money pool bear interest in accordance with the moneypool agreement. Companies that invest in the pool share the interest earned on a basis proportionate to their average monthly investment in the money pool. Funds may be withdrawn from or repaid to the pool at any time without prior notice. At December 31, 2011 and December 31, 2010, the Company had short-term money pool borrowings of \$169 million and \$21.3 million, respectively, which is included as notes payable to associated companies in the accompanying balance sheets. The average interest rate for the money pool was 0.18% and 0.26% for the years ended December 31, 2011 and December 31, 2010, respectively.

Accounts Receivable from/Payable to Associated Companies

The Company engages in various transactions with NGUSA and its affiliates. Certain activities and costs, such as executive and administrative, financial (including accounting, auditing, risk management, tax, and treasury/finance), human resources, information technology, legal, and strategic planning are shared among the companies and charged to each company appropriately. In addition, the Company has a tax sharing agreement with NGH, a NGUSA affiliate, in filing consolidated tax returns. The Company's share of tax liability is allocated resulting in a payment to or refund from NGH.

| The Narragansett Electric Company | | / / | 2011/Q4 |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | |

The Company records short-term payables to and receivables from certain of its affiliates in the ordinary course of business. The amounts payable to and receivable from its associates do not bear interest. At December 30, 2011 and December 31, 2010, the Company had outstanding receivable and payable positions as follows:

| | Accounts Receivable From Associated Companies | | Accounts Payable To Associated Companies | |
|--------------------------|-----------------------------------------------|----------------------|------------------------------------------|----------------------|
| | December 31, 2011 | December 31, 2010 | December 31, 2011 | December 31, 2010 |
| | <i>(in thousands of dollars)</i> | | | |
| Massachusetts Electric | \$ 887 | \$ 1,319 | \$ 851 | \$ 4,496 |
| New England Power | 3,815 | 7,512 | 2,367 | - |
| Nantucket Electric | 1,506 | - | - | - |
| Niagara Mohawk Power Co. | 1,500 | 5,991 | 713 | 5,419 |
| NGUSA Service Co. | 201 | 5,841 | 925 | - |
| KeySpan Corp Services | - | - | 3,695 | 2,054 |
| Other | 600 | 1,336 | 410 | (3,088) |
| Total | <u>\$ 8,509</u> | <u>\$ 21,999</u> | <u>\$ 8,961</u> | <u>\$ 8,881</u> |

Service Company Charges

The affiliated service companies of NGUSA provide certain services to the Company at their cost. The service company costs are generally charged to associated companies through a tiered approach. First and foremost, costs are directly charged to the benefited company whenever practicable. Secondly, in cases where direct charging cannot be readily determined, costs are typically allocated using cost/causation principles linked to the relationship of that type of service, such as meters, square footage, number of employees, etc. Lastly, all other costs are allocated based on a general allocator. These costs include operating and capital expenditure of \$149.3 million and \$145.4 million for the year ended December 31, 2011, and \$127.1 million and \$124 million for the year ended December 3010, respectively.

Note 11. Restrictions on Retained Earnings Available for Dividends on Common Stock

As long as any preferred stock is outstanding, certain restrictions on payment of dividends on common stock would come into effect if the "junior stock equity" was, or by reason of payment of such dividends became, less than 25% of "Total Capitalization." However, the junior stock equity at December 31, 2011 and December 31, 2010, was 70% and 69%, respectively, of total capitalization and goodwill as a portion of equity. Accordingly, none of the Company's retained earnings at December 31, 2011 and December 31, 2010 were restricted as to dividends on common stock under the foregoing provisions.

| ELECTRIC PLANT IN SERVICE (Account 101, 102, 103 and 106) | | | | | |
| <p>1. Report below the original cost of electric plant in service according to the prescribed accounts.</p> <p>2. In addition to Account 101, Electric Plant in Service (Classified), this page and the next include Account 102, Electric Plant Purchased or Sold; Account 103, Experimental Electric Plant Unclassified; and Account 106, Completed Construction Not Classified-Electric.</p> <p>3. Include in column (c) or (d), as appropriate, corrections of additions and retirements for the current or preceding year.</p> <p>4. For revisions to the amount of initial asset retirement costs capitalized, included by primary plant account, increases in column (c) additions and reductions in column (e) adjustments.</p> <p>5. Enclose in parentheses credit adjustments of plant accounts to indicate the negative effect of such accounts.</p> <p>6. Classify Account 106 according to prescribed accounts, on an estimated basis if necessary, and include the entries in column (c). Also to be included in column (c) are entries for reversals of tentative distributions of prior year reported in column (b). Likewise, if the respondent has a significant amount of plant retirements which have not been classified to primary accounts at the end of the year, include in column (d) a tentative distribution of such retirements, on an estimated basis, with appropriate contra entry to the account for accumulated depreciation provision. Include also in column (d)</p> | | | | | |

ELECTRIC PLANT IN SERVICE (Account 101, 102, 103 and 106) (Continued)

distributions of these tentative classifications in columns (c) and (d), including the reversals of the prior years tentative account distributions of these amounts. Careful observance of the above instructions and the texts of Accounts 101 and 106 will avoid serious omissions of the reported amount of respondent's plant actually in service at end of year.

7. Show in column (f) reclassifications or transfers within utility plant accounts. Include also in column (f) the additions or reductions of primary account classifications arising from distribution of amounts initially recorded in Account 102, include in column (e) the amounts with respect to accumulated provision for depreciation, acquisition adjustments, etc., and show in column (f) only the offset to the debits or credits distributed in column (f) to primary account classifications.

8. For Account 399, state the nature and use of plant included in this account and if substantial in amount submit a supplementary statement showing subaccount classification of such plant conforming to the requirement of these pages.

9. For each amount comprising the reported balance and changes in Account 102, state the property purchased or sold, name of vendor or purchase, and date of transaction. If proposed journal entries have been filed with the Commission as required by the Uniform System of Accounts, give also date

| ACCUMULATED PROVISION FOR DEPRECIATION OF ELECTRIC UTILITY PLANT (Account 108) | | | | | |
| 1. Explain in a footnote any important adjustments during year. 2. Explain in a footnote any difference between the amount for book cost of plant retired, Line 11, column (c), and that reported for electric plant in service, pages 204-207, column 9d), excluding retirements of non-depreciable property. 3. The provisions of Account 108 in the Uniform System of accounts require that retirements of depreciable plant be recorded when such plant is removed from service. If the respondent has a significant amount of plant retired at year end which has not been recorded and/or classified to the various reserve functional classifications, make preliminary closing entries to tentatively functionalize the book cost of the plant retired. In addition, include all costs included in retirement work in progress at year end in the appropriate functional classifications. 4. Show separately interest credits under a sinking fund or similar method of depreciation accounting. | | | | | |

| LONG-TERM DEBT (Account 221, 222, 223 and 224) | | | | | |
| <p>1. Report by balance sheet account the particulars (details) concerning long-term debt included in Accounts 221, Bonds, 222, Reacquired Bonds, 223, Advances from Associated Companies, and 224, Other long-Term Debt.</p> <p>2. In column (a), for new issues, give Commission authorization numbers and dates.</p> <p>3. For bonds assumed by the respondent, include in column (a) the name of the issuing company as well as a description of the bonds.</p> <p>4. For advances from Associated Companies, report separately advances on notes and advances on open accounts. Designate demand notes as such. Include in column (a) names of associated companies from which advances were received.</p> <p>5. For receivers, certificates, show in column (a) the name of the court -and date of court order under which such certificates were issued.</p> <p>6. In column (b) show the principal amount of bonds or other long-term debt originally issued.</p> <p>7. In column (c) show the expense, premium or discount with respect to the amount of bonds or other long-term debt originally issued.</p> <p>8. For column (c) the total expenses should be listed first for each issuance, then the amount of premium (in parentheses) or discount. Indicate the premium or discount with a notation, such as (P) or (D). The expenses, premium or discount should not be netted.</p> <p>9. Furnish in a footnote particulars (details) regarding the treatment of unamortized debt expense, premium or discount associated with issues redeemed during the year. Also, give in a footnote the date of the Commission's authorization of treatment other than as specified by the Uniform System of Accounts.</p> | | | | | |

| RECONCILIATION OF REPORTED NET INCOME WITH TAXABLE INCOME FOR FEDERAL INCOME TAXES | | | | |
| <p>1. Report the reconciliation of reported net income for the year with taxable income used in computing Federal income tax accruals and show computation of such tax accruals. Include in the reconciliation, as far as practicable, the same detail as furnished on Schedule M-1 of the tax return for the year. Submit a reconciliation even though there is no taxable income for the year. Indicate clearly the nature of each reconciling amount.</p> <p>2. If the utility is a member of a group which files a consolidated Federal tax return, reconcile reported net income with taxable net income as if a separate return were to be filed, indicating, however, intercompany amounts to be eliminated in such a consolidated return. State names of group member, tax assigned to each group member, and basis of allocation, assignment, or sharing of the consolidated tax among the group members.</p> <p>3. A substitute page, designed to meet a particular need of a company, may be used as long as the data is consistent and meets the requirements of the above instructions. For electronic reporting purposes complete Line 27 and provide the substitute Page in the context of a footnote.</p> | | | | |

| TAXES ACCRUED, PREPAID AND CHARGED DURING YEAR | | | | | | |
| <p>1. Give particulars (details) of the combined prepaid and accrued tax accounts and show the total taxes charged to operations and other accounts during the year. Do not include gasoline and other sales taxes which have been charged to the accounts to which the taxed material was charged. If the actual, or estimated amounts of such taxes are known, show the amounts in a footnote and designate whether estimated or actual amounts.</p> <p>2. Include on this page, taxes paid during the year and charged direct to final accounts, (not charged to prepaid or accrued taxes.)</p> <p>Enter the amounts in both columns (d) and (e). The balancing of this page is not affected by the inclusion of these taxes.</p> <p>3. Include in column (d) taxes charged during the year, taxes charged to operations and other accounts through (a) accruals credited to taxes accrued, (b) amounts credited to proportions of prepaid taxes chargeable to current year, and (c) taxes paid and charged direct to operations or accounts other than accrued and prepaid tax accounts.</p> <p>4. List the aggregate of each kind of tax in such manner that the total tax for each State and subdivision can readily be ascertained.</p> | | | | | | |

| ELECTRIC OPERATING REVENUES (Account 400) | | | | | |
| <p>1. The following instructions generally apply to the annual version of these pages. Do not report quarterly data in columns (c), (e), (f), and (g). Unbilled revenues and MWH related to unbilled revenues need not be reported separately as required in the annual version of these pages.</p> <p>2. Report below operating revenues for each prescribed account, and manufactured gas revenues in total.</p> <p>3. Report number of customers, columns (f) and (g), on the basis of meters, in addition to the number of flat rate accounts; except that where separate meter readings are added for billing purposes, one customer should be counted for each group of meters added. The -average number of customers means the average of twelve figures at the close of each month.</p> <p>4. If increases or decreases from previous period (columns (c),(e), and (g)), are not derived from previously reported figures, explain any inconsistencies in a footnote.</p> <p>5. Disclose amounts of \$250,000 or greater in a footnote for accounts 451, 456, and 457.2.</p> | | | | | |

| <p>6. Commercial and industrial Sales, Account 442, may be classified according to the basis of classification (Small or Commercial, and Large or Industrial) regularly used by the respondent if such basis of classification is not generally greater than 1000 Kw of demand. (See Account 442 of the Uniform System of Accounts. Explain basis of classification in a footnote.)</p> <p>7. See pages 108-109, Important Changes During Period, for important new territory added and important rate increase or decreases.</p> <p>8. For Lines 2,4,5,and 6, see Page 304 for amounts relating to unbilled revenue by accounts.</p> <p>9. Include unmetered sales. Provide details of such Sales in a footnote.</p> | | | | | |

| SALES FOR RESALE (Account 447) | | | | | | |
| <p>1. Report all sales for resale (i.e., sales to purchasers other than ultimate consumers) transacted on a settlement basis other than power exchanges during the year. Do not report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges on this schedule. Power exchanges must be reported on the Purchased Power schedule (Page 326-327).</p> <p>2. Enter the name of the purchaser in column (a). Do not abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the purchaser.</p> <p>3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows: RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers. LF - for long-term service. "Long-term" means five years or Longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for Long-term firm service which meets the definition of RQ service. For all transactions identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or setter can unilaterally get out of the contract. IF - for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but Less than five years. SF - for short-term firm service. Use this category for all firm services where the duration of each period of commitment for service is one year or less. LU - for Long-term service from a designated generating unit. "Long-term" means five years or Longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of designated unit. IU - for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means Longer than one year but Less than five years.</p> | | | | | | |

|---------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|---------------------------------------|-----------------------------------------|

SALES FOR RESALE (Account 447) (Continued)

OS - for other service. use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote.

AD - for Out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.

4. Group requirements RQ sales together and report them starting at line number one. After listing all RQ sales, enter "Subtotal - RQ" in column (a). The remaining sales may then be listed in any order. Enter "Subtotal-Non-RQ" in column (a) after this Listing. Enter "Total" in column (a) as the Last Line of the schedule. Report subtotals and total for columns (9) through (k)

5. In Column (c), identify the FERC Rate Schedule or Tariff Number. On separate Lines, List all FERC rate schedules or tariffs under which service, as identified in column (b), is provided.

6. For requirements RQ sales and any type of-service involving demand charges imposed on a monthly (or Longer) basis, enter the average monthly billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.

7. Report in column (g) the megawatt hours shown on bills rendered to the purchaser.

8. Report demand charges in column (h), energy charges in column (i), and the total of any other types of charges, including out-of-period adjustments, in column (j). Explain in a footnote all components of the amount shown in column (j). Report in column (k) the total charge shown on bills rendered to the purchaser.

9. The data in column (g) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruction 4), and then totaled on the Last -line of the schedule. The "Subtotal - RQ" amount in column (g) must be reported as Requirements Sales For Resale on Page 401, line 23. The "Subtotal - Non-RQ" amount in column (g) must be reported as Non-Requirements Sales For Resale on Page 401, line 24.

10. Footnote entries as required and provide explanations following all required data.

| PURCHASED POWER (Account 555) (Including power exchanges) | | | | | | |
| <p>1. Report all power purchases made during the year. Also report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges.</p> <p>2. Enter the name of the seller or other party in an exchange transaction in column (a). Do not abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the seller.</p> <p>3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:</p> <p>RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projects load for this service in its system resource planning). In addition, the reliability of requirement service must be the same as, or second only to, the supplier's service to its own ultimate consumers.</p> <p>LF - for long-term firm service. "Long-term" means five years or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for long-term firm service firm service which meets the definition of RQ service. For all transaction identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or seller can unilaterally get out of the contract.</p> <p>IF - for intermediate-term firm service. The same as LF service expect that "intermediate-term" means longer than one year but less than five years.</p> <p>SF - for short-term service. Use this category for all firm services, where the duration of each period of commitment for service is one year or less.</p> <p>LU - for long-term service from a designated generating unit. "Long-term" means five years or longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of the designated unit.</p> <p>IU - for intermediate-term service from a designated generating unit. The same as LU service expect that "intermediate-term" means longer than one year but less than five years.</p> <p>EX - For exchanges of electricity. Use this category for transactions involving a balancing of debits and credits for energy, capacity, etc. and any settlements for imbalanced exchanges.</p> <p>OS - for other service. Use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote for each adjustment.</p> | | | | | | |

| PURCHASED POWER(Account 555) (Continued) (Including power exchanges) | | | | | | | |
| <p>AD - for out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.</p> <p>4. In column (c), identify the FERC Rate Schedule Number or Tariff, or, for non-FERC jurisdictional sellers, include an appropriate designation for the contract. On separate lines, list all FERC rate schedules, tariffs or contract designations under which service, as identified in column (b), is provided.</p> <p>5. For requirements RQ purchases and any type of service involving demand charges imposed on a monthly (or longer) basis, enter the monthly average billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.</p> <p>6. Report in column (g) the megawatthours shown on bills rendered to the respondent. Report in columns (h) and (i) the megawatthours of power exchanges received and delivered, used as the basis for settlement. Do not report net exchange.</p> <p>7. Report demand charges in column (j), energy charges in column (k), and the total of any other types of charges, including out-of-period adjustments, in column (l). Explain in a footnote all components of the amount shown in column (l). Report in column (m) the total charge shown on bills received as settlement by the respondent. For power exchanges, report in column (m) the settlement amount for the net receipt of energy. If more energy was delivered than received, enter a negative amount. If the settlement amount (l) include credits or charges other than incremental generation expenses, or (2) excludes certain credits or charges covered by the agreement, provide an explanatory footnote.</p> <p>8. The data in column (g) through (m) must be totalled on the last line of the schedule. The total amount in column (g) must be reported as Purchases on Page 401, line 10. The total amount in column (h) must be reported as Exchange Received on Page 401, line 12. The total amount in column (i) must be reported as Exchange Delivered on Page 401, line 13.</p> <p>9. Footnote entries as required and provide explanations following all required data.</p> | | | | | | | |

PURCHASED POWER (Account 555) (Continued)
(Including power exchanges)

AD - for out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.

4. In column (c), identify the FERC Rate Schedule Number or Tariff, or, for non-FERC jurisdictional sellers, include an appropriate designation for the contract. On separate lines, list all FERC rate schedules, tariffs or contract designations under which service, as identified in column (b), is provided.

5. For requirements RQ purchases and any type of service involving demand charges imposed on a monthly (or longer) basis, enter the monthly average billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.

6. Report in column (g) the megawatthours shown on bills rendered to the respondent. Report in columns (h) and (i) the megawatthours of power exchanges received and delivered, used as the basis for settlement. Do not report net exchange.

7. Report demand charges in column (j), energy charges in column (k), and the total of any other types of charges, including out-of-period adjustments, in column (l). Explain in a footnote all components of the amount shown in column (l). Report in column (m) the total charge shown on bills received as settlement by the respondent. For power exchanges, report in column (m) the settlement amount for the net receipt of energy. If more energy was delivered than received, enter a negative amount. If the settlement amount (l) include credits or charges other than incremental generation expenses, or (2) excludes certain credits or charges covered by the agreement, provide an explanatory footnote.

8. The data in column (g) through (m) must be totalled on the last line of the schedule. The total amount in column (g) must be reported as Purchases on Page 401, line 10. The total amount in column (h) must be reported as Exchange Received on Page 401, line 12. The total amount in column (i) must be reported as Exchange Delivered on Page 401, line 13.

9. Footnote entries as required and provide explanations following all required data.

| TRANSMISSION OF ELECTRICITY BY OTHERS (Account 565) (Including transactions referred to as "wheeling") | | | | | | | | |
| <p>1. Report all transmission, i.e. wheeling or electricity provided by other electric utilities, cooperatives, municipalities, other public authorities, qualifying facilities, and others for the quarter.</p> <p>2. In column (a) report each company or public authority that provided transmission service. Provide the full name of the company, abbreviate if necessary, but do not truncate name or use acronyms. Explain in a footnote any ownership interest in or affiliation with the transmission service provider. Use additional columns as necessary to report all companies or public authorities that provided transmission service for the quarter reported.</p> <p>3. In column (b) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNS - Firm Network Transmission Service for Self, LFP - Long-Term Firm Point-to-Point Transmission Reservations, OLF - Other Long-Term Firm Transmission Service, SFP - Short-Term Firm Point-to-Point Transmission Reservations, NF - Non-Firm Transmission Service, and OS - Other Transmission Service. See General Instructions for definitions of statistical classifications.</p> <p>4. Report in column (c) and (d) the total megawatt hours received and delivered by the provider of the transmission service.</p> <p>5. Report in column (e), (f) and (g) expenses as shown on bills or vouchers rendered to the respondent. In column (e) report the demand charges and in column (f) energy charges related to the amount of energy transferred. On column (g) report the total of all other charges on bills or vouchers rendered to the respondent, including any out of period adjustments. Explain in a footnote all components of the amount shown in column (g). Report in column (h) the total charge shown on bills rendered to the respondent. If no monetary settlement was made, enter zero in column (h). Provide a footnote explaining the nature of the non-monetary settlement, including the amount and type of energy or service rendered.</p> <p>6. Enter "TOTAL" in column (a) as the last line.</p> <p>7. Footnote entries and provide explanations following all required data.</p> | | | | | | | | |

| DEPRECIATION AND AMORTIZATION OF ELECTRIC PLANT (Account 403, 404, 405) (Except amortization of acquisition adjustments) | | | | | | |
| <p>1. Report in section A for the year the amounts for : (b) Depreciation Expense (Account 403; (c) Depreciation Expense for Asset Retirement Costs (Account 403.1; (d) Amortization of Limited-Term Electric Plant (Account 404); and (e) Amortization of Other Electric Plant (Account 405).</p> <p>2. Report in Section 8 the rates used to compute amortization charges for electric plant (Accounts 404 and 405). State the basis used to compute charges and whether any changes have been made in the basis or rates used from the preceding report year.</p> <p>3. Report all available information called for in Section C every fifth year beginning with report year 1971, reporting annually only changes to columns (c) through (g) from the complete report of the preceding year.</p> <p>Unless composite depreciation accounting for total depreciable plant is followed, list numerically in column (a) each plant subaccount, account or functional classification, as appropriate, to which a rate is applied. Identify at the bottom of Section C the type of plant included in any sub-account used.</p> <p>In column (b) report all depreciable plant balances to which rates are applied showing subtotals by functional Classifications and showing composite total. Indicate at the bottom of section C the manner in which column balances are obtained. If average balances, state the method of averaging used.</p> <p>For columns (c), (d), and (e) report available information for each plant subaccount, account or functional classification Listed in column (a). If plant mortality studies are prepared to assist in estimating average service Lives, show in column (f) the type mortality curve selected as most appropriate for the account and in column (g), if available, the weighted average remaining life of surviving plant. If composite depreciation accounting is used, report available information called for in columns (b) through (g) on this basis.</p> <p>4. If provisions for depreciation were made during the year in addition to depreciation provided by application of reported rates, state at the bottom of section C the amounts and nature of the provisions and the plant items to which related.</p> | | | | | | |

RESEARCH, DEVELOPMENT, AND DEMONSTRATION ACTIVITIES

1. Describe and show below costs incurred and accounts charged during the year for technological research, development, and demonstration (R, D & D) project initiated, continued or concluded during the year. Report also support given to others during the year for jointly-sponsored projects. (Identify recipient regardless of affiliation.) For any R, D & D work carried with others, show separately the respondent's cost for the year and cost chargeable to others (See definition of research, development, and demonstration in Uniform System of Accounts).

2. Indicate in column (a) the applicable classification, as shown below:

Classifications:

A. Electric R, D & D Performed Internally:

(1) Generation

a. hydroelectric

i. Recreation fish and wildlife

ii Other hydroelectric

b. Fossil-fuel steam

c. Internal combustion or gas turbine

d. Nuclear

e. Unconventional generation

f. Siting and heat rejection

(2) Transmission

a. Overhead

b. Underground

(3) Distribution

(4) Regional Transmission and Market Operation

(5) Environment (other than equipment)

(6) Other (Classify and include items in excess of \$50,000.)

(7) Total Cost Incurred

B. Electric, R, D & D Performed Externally:

(1) Research Support to the electrical Research Council or the Electric Power Research Institute

| DISTRIBUTION OF SALARIES AND WAGES | | | | | |
| Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used. | | | | | |
| Line No. | Classification (a) | Direct Payroll Distribution (b) | Allocation of Payroll charged for Clearing Accounts (c) | Total (d) | |
| 1 | Electric | | | | |

| COMMON UTILITY PLANT AND EXPENSES | | | |
| <p>1. Describe the property carried in the utility's accounts as common utility plant and show the book cost of such plant at end of year classified by accounts as provided by Plant Instruction 13, Common Utility Plant, of the Uniform System of Accounts. Also show the allocation of such plant costs to the respective departments using the common utility plant and explain the basis of allocation used, giving the allocation factors.</p> <p>2. Furnish the accumulated provisions for depreciation and amortization at end of year, showing the amounts and classifications of such accumulated provisions, and amounts allocated to utility departments using the Common utility plant to which such accumulated provisions relate, including explanation of basis of allocation and factors used.</p> <p>3. Give for the year the expenses of operation, maintenance, rents, depreciation, and amortization for common utility plant classified by accounts as provided by the Uniform System of Accounts. Show the allocation of such expenses to the departments using the common utility plant to which such expenses are related. Explain the basis of allocation used and give the factors of allocation.</p> <p>4. Give date of approval by the Commission for use of the common utility plant classification and reference to order of the Commission or other authorization.</p> | | | |

AMOUNTS INCLUDED IN ISO/RTO SETTLEMENT STATEMENTS

1. The respondent shall report below the details called for concerning amounts it recorded in Account 555, Purchase Power, and Account 447, Sales for Resale, for items shown on ISO/RTO Settlement Statements. Transactions should be separately netted for each ISO/RTO administered energy market for purposes of determining whether an entity is a net seller or purchaser in a given hour. Net megawatt hours are to be used as the basis for determining whether a net purchase or sale has occurred. In each monthly reporting period, the hourly sale and purchase net amounts are to be aggregated and separately reported in Account 447, Sales for Resale, or Account 555, Purchased Power, respectively.

| Name of Respondent The Narragansett Electric Company | | This Report Is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission | | Date of Report (Mo, Da, Yr) / / | | Year/Period of Report End of 2011/Q4 | |
| STEAM-ELECTRIC GENERATING PLANT STATISTICS (Large Plants) | | | | | | | |
| 1. Report data for plant in Service only. 2. Large plants are steam plants with installed capacity (name plate rating) of 25,000 Kw or more. Report in this page gas-turbine and internal combustion plants of 10,000 Kw or more, and nuclear plants. 3. Indicate by a footnote any plant leased or operated as a joint facility. 4. If net peak demand for 60 minutes is not available, give data which is available, specifying period. 5. If any employees attend more than one plant, report on line 11 the approximate average number of employees assignable to each plant. 6. If gas is used and purchased on a term basis report the Btu content or the gas and the quantity of fuel burned converted to Mct. 7. Quantities of fuel burned (Line 38) and average cost per unit of fuel burned (Line 41) must be consistent with charges to expense accounts 501 and 547 (Line 42) as show on Line 20. 8. If more than one fuel is burned in a plant furnish only the composite heat rate for all fuels burned. | | | | | | | |

| STEAM-ELECTRIC GENERATING PLANT STATISTICS (Large Plants) (Continued) | | | | | | | | | |
| <p>9. Items under Cost of Plant are based on U. S. of A. Accounts. Production expenses do not include Purchased Power, System Control and Load Dispatching, and Other Expenses Classified as Other Power Supply Expenses. 10. For IC and GT plants, report Operating Expenses, Account Nos. 547 and 549 on Line 25 "Electric Expenses," and Maintenance Account Nos. 553 and 554 on Line 32, "Maintenance of Electric Plant." Indicate plants designed for peak load service. Designate automatically operated plants. 11. For a plant equipped with combinations of fossil fuel steam, nuclear steam, hydro, internal combustion or gas-turbine equipment, report each as a separate plant. However, if a gas-turbine unit functions in a combined cycle operation with a conventional steam unit, include the gas-turbine with the steam plant. 12. If a nuclear power generating plant, briefly explain by footnote (a) accounting method for cost of power generated including any excess costs attributed to research and development; (b) types of cost units used for the various components of fuel cost; and (c) any other informative data concerning plant type fuel used, fuel enrichment type and quantity for the report period and other physical and operating characteristics of plant.</p> | | | | | | | | | |

| PUMPED STORAGE GENERATING PLANT STATISTICS (Large Plants) (Continued) | | | |
| <p>6. Pumping energy (Line 10) is that energy measured as input to the plant for pumping purposes.</p> <p>7. Include on Line 36 the cost of energy used in pumping into the storage reservoir. When this item cannot be accurately computed leave Lines 36, 37 and 38 blank and describe at the bottom of the schedule the company's principal sources of pumping power, the estimated amounts of energy from each station or other source that individually provides more than 10 percent of the total energy used for pumping, and production expenses per net MWH as reported herein for each source described. Group together stations and other resources which individually provide less than 10 percent of total pumping energy. If contracts are made with others to purchase power for pumping, give the supplier contract number, and date of contract.</p> | | | |

| GENERATING PLANT STATISTICS (Small Plants) (Continued) | | | | | | |
| 3. List plants appropriately under subheadings for steam, hydro, nuclear, internal combustion and gas turbine plants. For nuclear, see instruction 11, Page 403. 4. If net peak demand for 60 minutes is not available, give the which is available, specifying period. 5. If any plant is equipped with combinations of steam, hydro internal combustion or gas turbine equipment, report each as a separate plant. However, if the exhaust heat from the gas turbine is utilized in a steam turbine regenerative feed water cycle, or for preheated combustion air in a boiler, report as one plant. | | | | | | |

| TRANSMISSION LINE STATISTICS | | | | | | | | |
| <p>1. Report information concerning transmission lines, cost of lines, and expenses for year. List each transmission line having nominal voltage of 132 kilovolts or greater. Report transmission lines below these voltages in group totals only for each voltage.</p> <p>2. Transmission lines include all lines covered by the definition of transmission system plant as given in the Uniform System of Accounts. Do not report substation costs and expenses on this page.</p> <p>3. Report data by individual lines for all voltages if so required by a State commission.</p> <p>4. Exclude from this page any transmission lines for which plant costs are included in Account 121, Nonutility Property.</p> <p>5. Indicate whether the type of supporting structure reported in column (e) is: (1) single pole wood or steel; (2) H-frame wood, or steel poles; (3) tower; or (4) underground construction. If a transmission line has more than one type of supporting structure, indicate the mileage of each type of construction by the use of brackets and extra lines. Minor portions of a transmission line of a different type of construction need not be distinguished from the remainder of the line.</p> <p>6. Report in columns (f) and (g) the total pole miles of each transmission line. Show in column (f) the pole miles of line on structures the cost of which is reported for the line designated; conversely, show in column (g) the pole miles of line on structures the cost of which is reported for another line. Report pole miles of line on leased or partly owned structures in column (g). In a footnote, explain the basis of such occupancy and state whether expenses with respect to such structures are included in the expenses reported for the line designated.</p> | | | | | | | | |
| Line No. | DESIGNATION | | VOLTAGE (KV) (Indicate where other than 60 cycle, 3 phase) | | Type of Supporting Structure (e) | LENGTH (Pole miles) (In the case of underground lines report circuit miles) | | Number Of Circuits (h) |

| TRANSMISSION LINE STATISTICS (Continued) | | | | | | | | |
| <p>7. Do not report the same transmission line structure twice. Report Lower voltage Lines and higher voltage lines as one line. Designate in a footnote if you do not include Lower voltage lines with higher voltage lines. If two or more transmission line structures support lines of the same voltage, report the pole miles of the primary structure in column (f) and the pole miles of the other line(s) in column (g)</p> <p>8. Designate any transmission line or portion thereof for which the respondent is not the sole owner. If such property is leased from another company, give name of lessor, date and terms of Lease, and amount of rent for year. For any transmission line other than a leased line, or portion thereof, for which the respondent is not the sole owner but which the respondent operates or shares in the operation of, furnish a succinct statement explaining the arrangement and giving particulars (details) of such matters as percent ownership by respondent in the line, name of co-owner, basis of sharing expenses of the Line, and how the expenses borne by the respondent are accounted for, and accounts affected. Specify whether lessor, co-owner, or other party is an associated company.</p> <p>9. Designate any transmission line leased to another company and give name of Lessee, date and terms of lease, annual rent for year, and how determined. Specify whether lessee is an associated company.</p> <p>10. Base the plant cost figures called for in columns (j) to (l) on the book cost at end of year.</p> | | | | | | | | |

TRANSMISSION LINES ADDED DURING YEAR

1. Report below the information called for concerning Transmission lines added or altered during the year. It is not necessary to report minor revisions of lines.
2. Provide separate subheadings for overhead and under- ground construction and show each transmission line separately. If actual costs of completed construction are not readily available for reporting columns (l) to (o), it is permissible to report in these columns the

| SUBSTATIONS (Continued) | | | | | | |
| <p>5. Show in columns (l), (j), and (k) special equipment such as rotary converters, rectifiers, condensers, etc. and auxiliary equipment for increasing capacity.</p> <p>6. Designate substations or major items of equipment leased from others, jointly owned with others, or operated otherwise than by reason of sole ownership by the respondent. For any substation or equipment operated under lease, give name of lessor, date and period of lease, and annual rent. For any substation or equipment operated other than by reason of sole ownership or lease, give name of co-owner or other party, explain basis of sharing expenses or other accounting between the parties, and state amounts and accounts affected in respondent's books of account. Specify in each case whether lessor, co-owner, or other party is an associated company.</p> | | | | | | |

| TRANSACTIONS WITH ASSOCIATED (AFFILIATED) COMPANIES | | | | | |
| 1. Report below the information called for concerning all non-power goods or services received from or provided to associated (affiliated) companies. 2. The reporting threshold for reporting purposes is \$250,000. The threshold applies to the annual amount billed to the respondent or billed to an associated/affiliated company for non-power goods and services. The good or service must be specific in nature. Respondents should not attempt to include or aggregate amounts in a nonspecific category such as "general". 3. Where amounts billed to or received from the associated (affiliated) company are based on an allocation process, explain in a footnote. | | | | | |

The Narragansett Electric Company
d/b/a National Grid
Division Docket No. D-12-12
In re: Application for Long-Term Debt Issuance
Responses to Division's First Set of Data Requests
Issued May 30, 2012

Division 1-5

Request:

Please provide Narragansett Electric's SEC Form 10Q for the quarter ending March 31, 2011.

Response:

The Company is not an SEC registrant, and therefore, the Form 10Q does not exist.

The Narragansett Electric Company
d/b/a National Grid
Division Docket No. D-12-12
In re: Application for Long-Term Debt Issuance
Responses to Division's First Set of Data Requests
Issued May 30, 2012

Division 1-6

Request:

Please state whether the planned long-term debt issue will be in the form of secured or unsecured debt. Please explain the basis for the decision.

Response:

The Company has not decided whether to issue secured or unsecured debt to date. The characteristics of the debt issuance will be driven by market conditions and investor demand.

The Narragansett Electric Company
d/b/a National Grid
Division Docket No. D-12-12
In re: Application for Long-Term Debt Issuance
Responses to Division's First Set of Data Requests
Issued May 30, 2012

Division 1-7

Request:

Please explain in detail and provide any supporting analysis for the dollar size of the planned long-term debt issue.

Response:

The Company is requesting authority to issue \$250 million to achieve a 50 percent debt to total capitalization ratio and to refinance its anticipated growth in short-term borrowing with long-term debt through March 31, 2014.

The Narragansett Electric Company
d/b/a National Grid
Division Docket No. D-12-12
In re: Application for Long-Term Debt Issuance
Responses to Division's First Set of Data Requests
Issued May 30, 2012

Division 1-8

Request:

Please provide a detailed and itemized estimate of all expenses to be incurred by the Company for the planned debt issuance.

Response:

The Company has provided in Exhibit B to its Application a current estimate of costs and expenses of issuing new debt. Exhibit B represents the standard fees charged by investment banks for acting as underwriters on U.S. domestic capital markets issues. The figure of \$0.40 million is an estimate of such expenses as legal fees, auditor fees, trustee fees and printing costs.

The Narragansett Electric Company
d/b/a National Grid
Division Docket No. D-12-12
In re: Application for Long-Term Debt Issuance
Responses to Division's First Set of Data Requests
Issued May 30, 2012

Division 1-9

Request:

Please describe the steps that Narragansett Electric plans to take to ensure that debt issuance-related expenses are reasonable and prudent.

Response:

The Company plans on issuing a Request for Proposal to various underwriters and financial institutions who specialize in managing the process of issuing long-term debt as part of its selection process. The Request for Proposal is intended to be used to evaluate the pricing and capabilities of the underwriters, and the role(s) they can play in the debt issuance.

The Narragansett Electric Company
d/b/a National Grid
Division Docket No. D-12-12
In re: Application for Long-Term Debt Issuance
Responses to Division's First Set of Data Requests
Issued May 30, 2012

Division 1-10

Request:

If Narragansett Electric has selected an underwriter or marketing agent for the debt issue, please identify and indicate the basis for the selection.

Response:

No selection has been made to date.

Division 1-11

Request:

Will the planned debt issuance be public or a private placement? Please explain the basis of the decision.

Response:

It is likely that the Company will elect to issue in a private offering, either through a revolving credit, term or other bank loan or a traditional private offering to accredited investors made up mostly of insurance companies or in a 144a offering to Qualified Institutional Buyers (QIBs), depending on the size of the offering. The private option provides ease of execution since it typically uses standard documentation and there are no public debt ratings or SEC registration requirements. In addition, the depth of the market provides flexibility with respect to tranche size, maturity, fixed/floating, and amortization structure. Further, the investor audience in the private market is financially sophisticated and needs less protection from issuers than most public investors. The advantage of the sophisticated investor audience allows for quick execution, no public rating requirements and greater acceptance of highly structured or unique credit situations.

Division 1-12

Request:

Will the planned debt issue include such features as call protection. If so, please describe. Please discuss the rationale for including or not including call protection.

Response:

The planned debt issuance will not include a call protection. The inclusion of any call protection would not only affect the price of the bond by the intrinsic value of the call protection, but as such inclusion is not market standard, marketability and consequently pricing would also likely be adversely affected.

The Narragansett Electric Company
d/b/a National Grid
Division Docket No. D-12-12
In re: Application for Long-Term Debt Issuance
Responses to Division's First Set of Data Requests
Issued May 30, 2012

Division 1-13

Request:

Will the planned issuance occur at one time or through multiple transactions? Please explain.

Response:

The Company currently has a high short-term borrowing balance and it plans to use the proceeds from the new financing to take down its short-term borrowing balance and maintain a 50 percent debt to capitalization ratio. The issuance may occur in one or more transactions depending upon the level of authorization received and capital market conditions.

The Narragansett Electric Company
d/b/a National Grid
Division Docket No. D-12-12
In re: Application for Long-Term Debt Issuance
Responses to Division's First Set of Data Requests
Issued May 30, 2012

Division 1-14

Request:

Is Narragansett Electric considering the use of a Treasury lock to hedge (or partially hedge) the transaction?

Response:

The Company is not currently considering the use of a Treasury lock.

Division 1-15

Request:

Please explain the Company's use of the debt issuance proceeds. In particular, will all proceeds be used for the benefit of Narragansett Electric utility customers? Will any of the debt issuance proceeds be flowed to the Company's parent or corporate affiliates?

Response:

The Company intends to use the debt issuance proceeds to refinance short-term debt, refinance maturing and/or redeemed issues of debt (including, without limitation, previously redeemed issues), finance the capital needs of the Company, or for other general corporate purposes. The debt issuance proceeds will pay down the short-term debt that the Company has borrowed from its affiliates as part of the money pool arrangement.

The Narragansett Electric Company
d/b/a National Grid
Division Docket No. D-12-12
In re: Application for Long-Term Debt Issuance
Responses to Division's First Set of Data Requests
Issued May 30, 2012

Division 1-16

Request:

Please describe the Company's short-term debt sources and facilities, including any limitations on short-term borrowing.

Response:

The Company participates with National Grid USA and certain affiliates in a system money pool that is administered by National Grid USA Service Company, Inc. as the agent. Short-term borrowing needs are met first by available funds from the money pool participants. The Company has regulatory approval from FERC to issue up to \$400 million of short-term debt. The Company also currently has board approval for up to \$250 million in non-interest bearing short-term open account advances from its parent company.

The Narragansett Electric Company
d/b/a National Grid
Division Docket No. D-12-12
In re: Application for Long-Term Debt Issuance
Responses to Division's First Set of Data Requests
Issued May 30, 2012

Division 1-17

Request:

Please identify the anticipated time line for the issuance, including supply the Division with any required post closing documents or information.

Response:

The Company intends to issue new debt in the second half of calendar 2012, provided it receives financing authorization from the Division in that time frame, contingent on capital market conditions.

The Narragansett Electric Company
d/b/a National Grid
Division Docket No. D-12-12
In re: Application for Long-Term Debt Issuance
Responses to Division's First Set of Data Requests
Issued May 30, 2012

Division 1-18

Request:

The Company entered into a settlement agreement with the Division in connection with its last long-term debt issuance. Please indicate any aspects of that Settlement and the Division's order in that case that the Company believes would be improper in this case. State any reasons for the Company's objections.

Response:

The Company is generally in agreement with the broad outlines of the 2009 Settlement agreement in Docket No. D-09-49. However, issuance and pricing is heavily dependent on market conditions. The Company would respectfully like to point out that pricing and timing of issue is dependent on capital market conditions. Therefore, the Company cannot guarantee provision 6 of the settlement agreement which caps the pricing at benchmark plus 350 basis points and treasury locks as stated in provision 16 of the settlement agreement.
