Thomas Kogut
Associate Administrator
R.I. Division of Public Utilities & Carriers
89 Jefferson Boulevard
Warwick, RI 02888

Dear Mr. Kogut:

For 32 years, Full Channel has consistently provided public, education and government access to its cable television facilities, which includes studio and camera access and the capacity for live telecasts by institutional users. For many years, the Bristol Town Council has utilized these services through Full Channel, airing live monthly meetings and special events on PEG TV over Full Channel's analog Institutional Network (I-Net).

With the evolution of digital technologies, it is now possible to deliver similar if not more advanced live television capabilities through the use of Internet Protocol Television (IPTV), which Full Channel has tested. I am writing to the Division today to seek its authorization, pursuant to Section 7.3(b) of the CATV Rules, to discontinue the preservation of Full Channel's separate analog I-Net infrastructure. In lieu of maintaining a physically separate I-Net, Full Channel proposes to provide institutional users with access to Full Channel's state-of-art IPTV system. This approach provides institutional users with high-quality, live video capability not available when utilizing Full Channel's legacy I-Net.

Granting Full Channel's request is in the public interest since IPTV technologies would provide new options and capabilities to schools, government service agencies, and institutional users in Service Area 5 by providing the ability to transmit and receive live digital video. Presently Full Channel's existing analog I-Net only supports the backhaul of live analog video connections from a fixed number of locations. Full Channel's state-of-the-art IP network allows institutional users to transmit live, digital video from any wired location within the Company's service area.

Please let me know if you have any questions about this request. I can be reached by email at linda@fullchannel.com.

Sincerely,

Linda Jane Maaia
President / CEO
