

Information Request CLF-1-1

Request:

For the analysis reported in Exhibit NG-JNC-3, please provide the following data:

- a. In machine-readable, spreadsheet form, present the annual generation in MWh for each state, region, resource type, fuel type, power plant, or unit where available, for each year covered by each scenario in this analysis.
- b. In machine-readable, spreadsheet form, present the annual generating capacity in MW for each state, region, resource type, fuel type, power plant, or unit where available, for each year covered by each scenario in this analysis.
- c. In machine-readable, spreadsheet form, present the annual carbon dioxide (CO₂) emissions in short tons for each state, region, resource type, fuel type, power plant, or where if available, for each year covered by each scenario in this analysis. Please include data for the six New England states, and for all other modeled states (including New York, Maryland, and Delaware) where this data are available.
- d. In machine-readable, spreadsheet form, present the annual demand for electricity in MWh for each state, region, zone, or node where available, for each year covered by each scenario in this analysis.
- e. In machine-readable, spreadsheet form, present the annual energy efficiency savings in MWh or annual savings as a percent of sales before energy efficiency for each state, region, zone, or node where available, for each year covered by each scenario in this analysis.
- f. In machine-readable, spreadsheet form, present the annual imports in MWh to New England from New York and Canada, or more finely defined regions, if available, for each year covered by each scenario in this analysis.
- g. In machine-readable, spreadsheet form, present the annual exports in MWh from New England to New York and Canada, or more finely defined regions, if available, for each year covered by each scenario in this analysis.
- h. In machine-readable, spreadsheet form, present the annual non-electric demand for natural gas in million cubic feet for each state, region, zone, node, or sector where available, for each year covered by each scenario in this analysis.

i. In machine-readable, spreadsheet form, present the annual non-electric energy efficiency for natural gas in avoided million cubic feet or annual savings as a percent of non-electric natural gas demand before energy efficiency for each state, region, zone, node, or sector where available, for each year covered by each scenario in this analysis.

j. In machine-readable, spreadsheet form, present the assumptions for renewable portfolio standards (RPS) in MWh or percent of affected demand for electricity (i.e., sales) for each state for each year covered by each scenario in this analysis.

Supplemental Response:

- c. Please see Attachment CLF-1-1 (Highly Sensitive Confidential Information) for plant emissions from Non-New England RGGI states. The Company's original response provided plant emissions only for New England RGGI states.

Original Response:

- a. This information was previously provided in Exhibit NEER-1-1 and Attachments NEER-1-1(b)(HIGHLY SENSITIVE CONFIDENTIAL INFORMATION) and NEER-1-1(c)(HIGHLY SENSITIVE CONFIDENTIAL INFORMATION).
- b. This information was previously provided in Exhibit NEER-1-1 and Attachment NEER-1-1(d)(HIGHLY SENSITIVE CONFIDENTIAL INFORMATION).
- c. This information was previously provided in Exhibit NEER-1-1 and Attachments NEER-1-1(b)(HIGHLY SENSITIVE CONFIDENTIAL INFORMATION) and NEER-1-1(c)(HIGHLY SENSITIVE CONFIDENTIAL INFORMATION).
- d. This information was previously provided in Exhibit NEER-1-1 and Attachment NEER-1-1(f).
- e. Energy efficiency savings are not available from this analysis. Black & Veatch uses the energy and demand forecasts from the ISO-NE 2015 CELT report, and any assumed energy efficiency savings would be embedded in these forecasts.
- f. This information was previously provided in Exhibit NEER-1-1 and Attachment NEER-1-1(e) (HIGHLY SENSITIVE CONFIDENTIAL INFORMATION).

- g. This information was previously provided in Exhibit NEER-1-1 and Attachment NEER-1-1(e) (HIGHLY SENSITIVE CONFIDENTIAL INFORMATION).
- h. This information was provided previously in Attachment NEER-1-1(j)(HIGHLY SENSITIVE CONFIDENTIAL INFORMATION). The annual non-electric demand for natural gas remained unchanged in each scenario.
- i. Non-electric energy efficiency savings are not available for this analysis. Black & Veatch's projection of non-electric demand was informed by a compilation of natural gas local distribution companies' long-term supply and demand resource plans and any assumed energy efficiency savings would be embedded in these forecasts.
- j. This information was previously provided in Exhibit NEER-1-1 and Attachments NEER-1-1(b)(HIGHLY SENSITIVE CONFIDENTIAL INFORMATION).
