RE: Generator Approval for North Haven 232 Rimmon Rd

Dear John T. Beauton:

The United Illuminating Company (UI) witnessed the operational testing of the 4980.0 kW Inverter generator system by Greenskies Renewable Energy on 11/05/2020 at 232 Rimmon Rd in North Haven, Connecticut. The 4980.0 generator system consists of (60) Solectria Model XVI1000-65 inverters and (18) Solectria Model XVI1000-60 inverters. Based on the test results and inspection of the inverter generator system, UI approves the parallel operation of the generator system with our local distribution system. The generator system as installed and approved by the local electrical inspector, does comply with UI's interconnection requirements. Any modifications or changes to the electrical characteristics of the generator system and/or interconnecting facility will void this approval and must be brought to UI's attention for review and approval prior to the change. This approval is contingent upon on going compliance with UI's Interconnection Guide "Guidelines for Generator Interconnection, Fast Track and Study Processes". This document is based on revision dated 8-Apr-2019.

**Annually:** Please provide the Distributed Generation Group with an updated certificate of insurance as described in the interconnection guidelines. The current documentation that is on file will expire on **7/20/2021**. A copy of this document can be emailed to [generator.connection@uinet.com](mailto:generator.connection@uinet.com), faxed to (203) 903-0966, or mailed to the following address:
