

Filed as Division Docket- D-14-191 **(CLOSED)**

On October 21, 2014 Full Channel, Inc. informed the cable section that it would seek permission to abandon its analog institutional network (I-Net) in favor of an internet protocol system (IPTV) in Service Area 5. The Division propounded two sets of data requests, and wrote to municipal officials in each of the three Area 5 communities (Barrington, Warren and Bristol) asking whether the institutional users had any questions or concerns. None were forwarded to the Division. An order approving the requested abandonment of the Area 5 I-Net in favor of the IPTV technology was issued on March 4, 2005. On July 21, 2015, Full Channel, Inc. notified the cable section that it had removed power supplies and amplifiers associated with the I-Net system, thus concluding its decommissioning.
